Prabhavit Gupta

AI Engineer: Internal Automation, Autonomous Agents & Production Systems

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU Permanent Resident / Open to Spain / Remote)

Summary

Forward Deployed AI Engineer based in Venice, Italy with European Long-Term Residence (unrestricted EU work authorization) and immediate availability for remote roles or relocation to Spain. 3+ years of production experience designing, building, and operating end-to-end AI automation workflows, autonomous agents, and internal tooling using Python, TypeScript, and modern LLM frameworks. Proven track record embedding directly with operational teams to analyze manual business friction, design automated pipelines, and ship resilient agentic architectures (tool calling, RAG pipelines, schema validation, failure recovery). Shipped multiple production LLM systems serving thousands of active users, combining rapid prototyping with robust observability, Docker containerization, and CI/CD automation.

Experience

FlowSpace.co • *Lead Developer & AI Systems Architect (Freelance)*
Mar 2024 - Aug 2026 • London, UK (remote)

- Designed, shipped, and maintained production AI agent systems and internal workflow automations for a platform serving 4,500+ active enterprise users, reducing manual operational burden.
- Implemented schema-enforced tool-calling loops and multi-step agent workflows connecting operational datastores, partner APIs, and LLM backends (Anthropic Claude, OpenAI).
- Built automated ingestion and extraction pipelines for unstructured documents (PDFs, invoices, spreadsheets), enforcing strict schema conformance and error boundaries before persistence.
- Profiled latency, token consumption, and failure modes across model releases, implementing automated evaluation harnesses and prompt optimizations to reduce inference costs.
- Automated CI/CD integration with GitHub Actions and Docker, ensuring zero downtime and stable continuous deployments across microservices.
- Coordinated testing frameworks and quality gates across engineering disciplines and external partners during major backend migrations.
- *Tools: Python, TypeScript, Anthropic Claude API, OpenAI API, Docker, GitHub Actions, PostgreSQL, Supabase, Linux*

Urlink • *Project Manager & Solutions Developer (Freelance)*
Apr 2025 - Jul 2025 • Barcelona, Spain (remote)

- Led technical discovery and end-to-end delivery of automated business workflows and client onboarding agents for European operations.
- Built custom API integrations and automated data validation pipelines connecting third-party platforms to PostgreSQL databases, guaranteeing data consistency.
- Managed project delivery end-to-end: gathered requirements, established testing coverage criteria, built POC prototypes, and delivered maintainable documentation.
- *Tools: Python, TypeScript, Postman, Claude Code, Supabase, REST APIs*

Independent Technical Consultant • *AI Solutions & Automation Engineer*
Sep 2023 - Mar 2024 • Venice, Italy

- Delivered custom internal automation pipelines, webhook listeners, and AI extraction scripts for European businesses using Python, TypeScript, and n8n.
- Replaced error-prone manual spreadsheets with structured event-driven workflows with automatic retries, dead-letter alerts, and structured audit logs.
- Conducted hands-on technical onboarding, client stakeholder demos, and workflow training, achieving high user adoption across newly automated operational processes.
- *Tools: Python, TypeScript, n8n, Supabase, Webhooks, REST APIs*

Tractionboard.co • *Low-Code Developer (Internship)*
Aug 2023 - Oct 2023 • Utrecht, Netherlands (remote)

- Integrated LLM API workflows and email verification services, debugged responsive web applications, and built test scenarios for core user funnels.
- *Tools: OpenAI API, Sendgrid, Figma, REST APIs*

Education

Ca' Foscari University of Venice • *Bachelor's in Philosophy, International Studies & Economics, Minor in Entrepreneurship*
Oct 2020 - Jun 2024 • Venice, Italy

Certifications

Microsoft Copilot Studio Agent Academy • Microsoft: Introduction to building AI agents • Microsoft Power Automate • Tray.AI Build Practitioner (Sep 2024) • Tray.AI Build Foundations

Additional Information

- **Work authorization:** European Long Term Residence Permit (Italy), unrestricted EU work authorization across Spain and all EU member states, no sponsorship needed. Available immediately.
- **Languages:** English (fluent / C1 professional), Hindi (native), Italian (beginner).

Core Skills

- **AI & Autonomous Agents:** LLM application development, multi-step agent loops, function/tool calling, RAG architectures, prompt engineering, evaluation harnesses, synthetic data generation, Claude Code workflows.
- **Software Engineering:** Python, TypeScript, Node.js, RESTful API design, JSON Schema validation, asynchronous execution patterns, Git version control.
- **Internal Automation & Integration:** Workflow orchestration, n8n, webhook listeners, data synchronization pipelines, automated alerting, ETL pipelines.
- **Infrastructure & DevOps:** Docker containerization, GitHub Actions CI/CD, Linux system administration, PostgreSQL, Supabase.
