Prabhavit Gupta

Senior AI Product Security Engineer: Web, API & Cloud Security

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (CET Time Zone / EU Permanent Resident / Available Immediately)

Summary

AI Product and Application Security Engineer with 3 years of production engineering experience securing enterprise AI systems, distributed microservice architectures, and cloud-native infrastructure. Proven expertise conducting rigorous Web and API security assessments, identifying OWASP Top 10 vulnerabilities, and evaluating authentication, authorization, and business logic flaws across client-facing endpoints. Skilled in container security, Kubernetes hardening, and integrating automated SAST, DAST, SCA, and secrets detection tooling directly into GitHub Actions CI/CD pipelines. Dedicated and proactive engineer available immediately for full-time remote engineering positions without notice period.

Technical Expertise

- **Product & Application Security:** Web and REST API security testing, OWASP Top 10 / API Top 10, authentication and session management (OAuth2, OIDC, JWT), RBAC/ABAC authorization testing, threat modeling, business logic abuse prevention.
- **Security Testing & Tooling:** Burp Suite, OWASP ZAP, vulnerability discovery and validation, SAST/DAST tooling, dependency scanning (Trivy, Dependabot), automated secret scanning (TruffleHog, Gitleaks).
- **Cloud & Container Security:** Kubernetes pod security standards, container image hardening (distroless/minimal base images), cloud IAM least-privilege policies, secret management, ingress TLS configuration.
- **Secure SDLC & CI/CD:** Automated security gates in GitHub Actions, PR quality gates, regression test automation with pytest and Playwright, code review security practices.
- **Languages & Backend:** Python (FastAPI, asyncio, requests), TypeScript/Node.js, SQL (PostgreSQL, query hardening, SQL injection prevention), Bash shell scripting.
- **Languages & Availability:** English (C1 Professional, fluent), Hindi (Native), Italian (Conversational). Available immediately without notice period.

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead AI Application & Security Engineer *London, UK (remote)*

- Led security assessments across enterprise AI products and API services, auditing 15+ external API connectors and client-facing endpoints serving 4,500+ users.
- Performed hands-on vulnerability testing using Burp Suite and OWASP ZAP, identifying and remediating authorization bypasses, SSRF risks, and token handling bugs.
- Integrated automated SAST, dependency vulnerability scanning (Trivy), and secret scanning gates into GitHub Actions CI/CD pipelines, blocking insecure commits prior to deployment.
- Hardened Docker container build pipelines and Kubernetes cluster manifests, enforcing non-root users, read-only root filesystems, and minimal network attack surfaces.
- Authored threat models and risk assessment matrices for autonomous agentic workflows and tool-calling integrations, preventing indirect prompt injection exploits.

Urlink **Apr 2025 - Jul 2025**
Application Security & Platform Developer (Freelance) *Barcelona, Spain (remote)*

- Conducted security testing of external REST API endpoints, implementing automated payload sanitization, strict Pydantic schema validation, and rate-limiting controls.
- Configured automated security regression test suites with pytest and Playwright, testing session invalidation, CORS configurations, and TLS enforcement.
- Audited cloud infrastructure configurations and Docker environments to ensure secure credential isolation and minimal attack surface exposure.

Independent Technical Consultant **Aug 2023 - Feb 2024**
Security & Systems Engineer *Venice, Italy*

- Performed application security assessments and code reviews for European SMB web applications, hardening authentication flows and database queries.

- Deployed automated vulnerability scanners and log auditing scripts on Linux servers, providing actionable remediation reports to development teams.
- Authored secure coding standards and API integration guidelines for client developers.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous training in formal logic, statistical inference, quantitative economics, and complex systems modeling.
