Prabhavit Gupta

Forward Deployed Engineer | AI-Native Dev, Agent Runtimes (JetBrains Central) & LLMOps Governance

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU Permanent Resident | Relocation Ready to Madrid/Amsterdam | Immediate Availability)

Executive Summary

- **Forward Deployed Engineering & AI-Native Adoption:** Forward Deployed Engineer with 3 years commercial software experience deploying production-grade AI platforms, developer tool integrations, and agent-driven workflows across European enterprises.
- **Agent Execution Runtimes & Enterprise Governance:** Specialized in architecting governed agentic execution layers, shared semantic context across repositories, and Model Context Protocol (MCP) tool integrations. Implements strict identity, access control, auditability, and token/cost attribution for autonomous coding agents.
- **Observability, Evaluation Harnesses & Consultant Mindset:** Experienced embedding directly with engineering leadership and enterprise development teams to move organizations from ad-hoc LLM experimentation to reliable, governed AI-native SDLCs. Holds EU Permanent Residency with full right to work across the EU without sponsorship.

Technical Skills & Core Competencies

- **AI-Native Development & Agents:** JetBrains Central Concepts, Agent Execution Infrastructure, Model Context Protocol (MCP), LangGraph, Claude Code, Autonomous Coding Agents, Context Pruning.
- **Developer Platforms & CI/CD:** Git, GitHub Actions, CI/CD Integration, Docker, Developer Environments, Infrastructure Automation, Artifact Management, API Gateways.
- **Core Software Engineering:** Python (AsyncIO, Typing, PyTest), Java/TypeScript Familiarity, FastAPI, REST/GraphQL APIs, Microservices, Clean Architecture.
- **AI Governance & LLMOps:** Identity & Access Control, Distributed Tracing (Langfuse), DeepEval, Cost Attribution, Prompt Regression Suites, Hallucination Prevention.
- **Consulting & Stakeholder Delivery:** Technical Scoping, Architecture Advisory, Partner Enablement, Customer Training, Enterprise Onboarding.

Professional Experience

Forward Deployed AI Engineer & Solutions Consultant • *Independent / AI Product Engineering Consultancy*
2024 – Present • Venice, IT (Remote / Hybrid Europe)

- Embedded with enterprise engineering teams to deploy agentic developer platforms and transition engineering organizations toward governed AI-native development workflows.
- Engineered agent execution infrastructure coordinating tool calling, repository semantic indexing, and sandboxed execution via Model Context Protocol (MCP).
- Implemented enterprise AI governance layers, enforcing policy checks, rate-limiting, and cost attribution monitoring across multi-model provider endpoints.
- Established automated evaluation pipelines (DeepEval, RAGAS) and distributed tracing (Langfuse), providing real-time visibility into agent task success, latency, and code quality.
- Authored implementation playbooks, partner enablement guides, and technical architectures presented directly to client CTOs and engineering leadership.

Full-Stack AI Software Engineer • *Tech Automation Systems*
2023 – 2024 • Milan / Remote, IT

- Built asynchronous developer-facing services in Python and TypeScript, automating code parsing, structured data extraction, and developer workflow orchestration.
- Integrated automated testing suites into continuous integration pipelines, raising deployment reliability and eliminating manual verification bottlenecks.
- Designed semantic caching and retrieval layers utilizing PostgreSQL (pgvector) and Redis, ensuring sub-second response times for developer knowledge queries.
- Collaborated with product and platform teams to translate customer pain points into modular, maintainable system capabilities.

Key Engineering Projects

- **Agentic Developer Platform Gateway (MCP + Python + Docker):** Governed execution runtime connecting autonomous agents to repository tools, file manipulation APIs, and CI test harnesses with real-time auditability.
- **AI Observability & Cost Attribution Pipeline (Langfuse + FastAPI):** Centralized telemetry system monitoring token expenditure, agent tool dispatch success, and latency profiles across distributed engineering teams.

Education, Languages & Legal Status

- **Bachelor of Arts in Philosophy & Economics** – Ca' Foscari University of Venice (2018 – 2022)
  Rigorous foundation in formal logic, epistemology, decision theory, and complex systems analysis.
- **Languages:** English (C1 Full Professional / Fluent), Italian (Working proficiency), Hindi (Native).
- **Work Authorization & Legal Status:** EU Long-Term Resident (Permesso di Soggiorno UE a Tempo Indeterminato, Italy) – Unrestricted legal right to live and work across the EU (Spain, Netherlands, Germany, Czech Republic) without sponsorship; ready for relocation.
