Summary

Engineer with about three years of customer-facing experience delivering software integrations and implementations. At FlowSpace I integrated the OfficeRnD and Nexudus APIs (REST, OAuth, webhooks), led a live migration off a legacy stack (mapped the data model, chose the migration path per entity, API or CSV, and drove the cutover) while the platform grew from 2,000 to 4,500+ users, and worked directly with customers, the sales and operations team and an external agency. I troubleshoot with Postman, track work in Jira and ClickUp, and document product and business logic so teams can follow it. Italian at beginner level. Based in Venice, open to relocating to Krakow, available immediately.

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review. 900+ listings drafted.
- Streamlined customer support with AI agents that answer queries against live platform data and escalate to a person on low confidence.
- Integrated the OfficeRnD and Nexudus APIs for automated bookings, and built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n.
- Led the migration off a legacy stack to a coded Next.js and Laravel product: mapped the data model, chose the migration path per entity (API or CSV) and drove the cutover. Scaled the platform from 2,000 to 4,500+ users.
- Documented product and business logic with the developer team, coordinated between the internal team and an external agency, and built a commute-time calculator tool for companies.
