Prabhavit Gupta

Agentic AI Developer: Autonomous Agents, LangGraph & MCP

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (CET Time Zone / EU Permanent Resident / Available Immediately)

Summary

Agentic AI Systems Engineer with 3 years of commercial production experience architecting autonomous multi-agent loops, state graph workflows, and enterprise tool-calling integrations. Deep hands-on expertise building production systems using LangGraph, LangChain, and Model Context Protocol (MCP), enabling LLMs (Claude 3.5 Sonnet, GPT-4o) to reason, plan, invoke external APIs, and execute complex workflows independently. Proven track record implementing short- and long-term memory structures, schema validation guardrails, and automated evaluation harnesses that eliminate hallucinations and rogue execution paths. Dedicated and proactive engineer available immediately for full-time remote roles without notice period.

Technical Expertise

- **Agentic Frameworks & Runtimes:** LangGraph (state machines, cyclical loops), LangChain, AutoGen, CrewAI, Model Context Protocol (MCP), Anthropic Tool Use, OpenAI Function Calling.
- **Reasoning & Memory Management:** Chain-of-thought reasoning, self-reflection, planning agents, long-term vector memory (Qdrant, Pinecone, Chroma), conversational state persistence with Redis.
- **Tool & API Integrations:** Exposing enterprise RESTful APIs and databases to agents, strict Pydantic payload validation, sandboxed execution, rate-limiting, and error recovery.
- **Safety Guardrails & Evaluation:** NeMo Guardrails, automated evaluation suites (prompt regression, tool misuse detection, cost/token tracking), human-in-the-loop approvals.
- **Backend & Infrastructure:** Python (asyncio, FastAPI, httpx), Docker containerization, PostgreSQL, Redis, Linux headless server administration.
- **Languages & Availability:** English (C1 Professional, fluent), Hindi (Native), Italian (Conversational). Available immediately without notice period.

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Agentic AI Engineer & Forward Deployed Architect *London, UK (remote)*

- Designed and deployed autonomous multi-agent orchestration systems in Python using LangGraph and MCP, automating complex multi-step data workflows for 4,500+ enterprise users.
- Built custom Model Context Protocol (MCP) servers exposing internal databases and 15+ external cloud services to Claude 3.5 Sonnet and GPT-4o with strict schema enforcement.
- Implemented stateful short-term and long-term memory architectures using Redis and vector search, enabling agents to maintain context across multi-turn sessions.
- Established automated evaluation pipelines and guardrails monitoring tool invocation accuracy, reducing unauthorized actions and hallucinations to under 0.2%.
- Optimized asynchronous execution loops and semantic caching, decreasing median agent response latency by 35% and lowering token consumption.

Urlink **Apr 2025 - Jul 2025**
AI Systems & Platform Developer (Freelance) *Barcelona, Spain (remote)*

- Developed automated LLM agent workflows in Python that dynamically query external REST APIs, validate responses via Pydantic, and write normalized records to databases.
- Implemented error handling, exponential backoff retries, and token rate-limiting across multi-tenant agent execution threads.
- Created comprehensive test suites with pytest and Playwright to verify deterministic behavior and schema adherence across agent tool invocations.

Independent Technical Consultant **Aug 2023 - Feb 2024**
Applied AI Developer *Venice, Italy*

- Built autonomous task automation prototypes and document analysis agents for European SMB clients using LangChain and OpenAI APIs.
- Deployed containerized agent microservices on remote Linux VPS instances using Docker and systemd daemons.

- Authored technical architecture runbooks and integration specifications for client engineering leadership.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous training in formal logic, statistical inference, quantitative economics, and complex systems modeling.
