Summary

I build full-stack web applications and workflow automations end to end using Claude Code as my daily development tool. At FlowSpace I was the sole engineer on multiple product features: I shipped a React/Next.js frontend, integrated third-party APIs (OfficeRnD, Nexudus) with OAuth2, pagination, rate limiting, and webhooks, and built an AI listing pipeline that calls Anthropic and OpenAI APIs directly with structured outputs and function calling to process 900+ records autonomously. I built n8n and Zapier workflows that connect CRMs, forms, databases, and external services to automate lead routing, provider onboarding, and content generation. I designed Airtable and Google Sheets backends for internal tools and client-facing data. I work comfortably as a sole or near-sole engineer, scoping work in tight cycles and documenting systems so nothing depends on one person. Based in Italy with an EU long-term residence permit, available immediately.

Experience

FlowSpace.co — **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) — *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
