Summary

I build modular AI-driven workflows that scale across departments. At FlowSpace I designed and deployed an n8n-orchestrated pipeline that ingests unstructured data (PDFs, web pages, spreadsheets, photos), extracts structured records via LLM (Claude, OpenAI), routes them through human review, and publishes to the platform. This system processed 900+ building listings, cutting provider onboarding from days to hours. I also built reusable automation modules with n8n for CRM lead capture, data enrichment via vendor API webhooks, and RAG-powered AI support agents that answer queries against live platform data. I prioritize business impact over perfect code, ship fast, and make pragmatic build-vs-buy decisions on tooling. Based in Italy with an EU long-term residence permit, available immediately.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
