Summary

I build AI-powered products end to end, from scoping to production, using Claude Code as my primary development tool. At FlowSpace I built an agentic listing pipeline that takes any document format (PDF, web, photo, spreadsheet), processes it through Claude and OpenAI APIs with structured outputs, function calling, evaluation, retry logic, and fallback handling, then routes through human review before pushing to the backend. It produced 900+ reviewed records. I owned the full product and engineering lifecycle: scoping integrations (OfficeRnD, Nexudus via OAuth2 and webhooks), making architecture calls, and shipping with minimal oversight. I built AI support agents and workflow automations with n8n that operate autonomously against live platform data. Stack: Next.js, React, TypeScript, PostgreSQL, Prisma, Supabase. Based in Italy, EU long-term residence permit, available immediately.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
