Summary

I build AI-powered tools that turn unstructured information into structured, accessible knowledge. At FlowSpace I built a document processing bot that takes raw inputs in any format (PDFs, brochures, web pages, photos, spreadsheets) and transforms them into standardized records via LLM, serving thousands of users daily. I also designed knowledge workflows that capture expert input, structure it into consistent formats, and make it searchable across the organization. I led the migration of a production platform to modern frameworks while the product stayed live, and I am comfortable working directly with stakeholders to map processes and translate operational expertise into digital tools. Based in Italy with an EU long-term residence permit, available immediately.
