Summary

I build and deploy AI-powered customer experience automation in production. At FlowSpace I shipped AI support agents that handle real user queries against live platform data, with human-in-the-loop escalation for low-confidence responses. I designed and orchestrated CRM and GTM automation workflows end to end using n8n, integrating LLM APIs for intelligent routing and response generation. I also built an AI bot that processes unstructured documents (PDFs, web pages, photos) into structured records via LLM, serving thousands of users daily. Based in the EU, available immediately, no sponsorship needed.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
