Summary

I find operational friction and ship AI-driven solutions fast. At FlowSpace I built an n8n-orchestrated pipeline that takes unstructured inputs (PDFs, web pages, spreadsheets, photos), extracts data via LLM (Claude, OpenAI), structures it into standardized records, routes it through human review, and publishes it. I processed 900+ building listings through this system, reducing provider onboarding from days of manual data entry to hours. I also built internal automation tools with n8n for CRM workflows, lead capture, and data enrichment, plus AI support agents that answer queries against live platform data using RAG. I use Claude Code daily as my primary development tool, have shipped with Lovable, and am comfortable making rapid build-vs-buy decisions on automation tooling. Based in Italy with an EU long-term residence permit, available immediately.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
