Summary

I build marketing and growth automations powered by AI agents. At FlowSpace I designed n8n workflows that orchestrate CRM operations, provider onboarding, lifecycle campaigns, and GTM processes across APIs, webhooks, and LLM calls. I built AI agents that automate content generation, lead qualification, and data enrichment using Claude, OpenAI, and Gemini APIs with prompt engineering, function calling, and context management. I also built an AI pipeline that ingests unstructured data in any format (PDFs, websites, photos, spreadsheets), classifies and routes through human review, and publishes structured records to the platform, processing 900+ listings autonomously. I integrated third-party APIs end to end (OfficeRnD, Nexudus, Stripe) with OAuth2, webhooks, retries, and monitoring. I set up event tracking and analytics dashboards to measure funnel performance and campaign impact. I led the migration of the full platform off a legacy stack to Next.js and Laravel, scaling from 2,000 to 4,500+ users while the product stayed live. I use Claude Code as my primary development tool daily. Based in Italy with an EU long-term residence permit, available immediately.
