Summary

I build AI-powered product features end to end, from prompt design through evaluation to production deployment. At FlowSpace I built an AI listing pipeline that processes any document format (PDF, web page, photo, spreadsheet) through Claude and OpenAI APIs with structured outputs and function calling, producing 900+ reviewed records with evaluation benchmarks, retry logic, and cost tracking. I built AI support agents that answer user queries against live platform data, and workflow automations that run autonomously. I own the full integration lifecycle for third-party APIs (OAuth2, webhooks, error recovery) and I review all AI-generated code for correctness and security before it ships. I use Claude Code as my primary development tool for rapid iteration on AI features. Based in Italy, EU long-term residence permit, available immediately.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
