## Summary

I manage AI and automation projects from strategy through adoption. At FlowSpace I coordinated the rollout of AI-powered tools across the platform: I gathered requirements from workspace providers, planned deployment timelines, trained teams on new systems, and tracked adoption metrics. I bridged communication between technical and non-technical stakeholders, translating business needs into actionable specs for the engineering team. I managed the deployment of CRM integrations (OfficeRnD, Nexudus), workflow automations (n8n), and an AI listing pipeline that produced 900+ reviewed records. I oversaw the platform migration off a legacy stack, coordinating the cutover while keeping the product live for 4,500+ users. Based in Italy, EU long-term residence permit, available immediately.

## Experience

**FlowSpace.co** **Mar 2024 – Aug 2026**
*Full-Stack & AI Engineer (Full-time, Freelance)* *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
