Prabhavit Gupta

Sales Engineer | AI Agent Infrastructure, Headless Browsers (Playwright/CDP) & Solutions Architecture

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU Permanent Resident | Open to Relocation to SF)

Executive Summary

- **Technical Sales & Solutions Engineering:** Solutions-oriented engineer with 3 years commercial software experience bridging complex developer infrastructure with customer engineering teams, conducting live technical walkthroughs, building rapid POCs, and driving developer adoption.
- **Browser Automation, Playwright & CDP Depth:** Deep hands-on expertise orchestrating headless Chromium instances, Chrome DevTools Protocol (CDP), Playwright test/scraping harnesses, Model Context Protocol (MCP) integrations, and DOM interaction reliability under complex web conditions.
- **Customer Architecture & Technical Enablement:** Experienced in scoping ambiguous customer requirements, architecting reference implementations, troubleshooting integration edge cases on live calls, and translating customer feedback into actionable engineering roadmap enhancements.

Technical Skills & Core Competencies

- **Sales Engineering & Pre-Sales:** Technical Demonstrations, Proof of Concept (POC) Builds, Solution Architecture, Pre-Sales Discovery, Customer Onboarding, Technical Objection Handling, Developer Guides & Reference Architectures.
- **Browser Infrastructure & Protocols:** Playwright, Puppeteer, Chrome DevTools Protocol (CDP), Headless Browser Infrastructure, DOM Inspection, Web Scraping, Session State Management, Anti-Bot Handling.
- **AI Agent Tooling & APIs:** Model Context Protocol (MCP), Autonomous Agent Tool Loops, Tool Calling, Structured Outputs (Zod, Pydantic), Prompt Engineering, Agent Evaluation Suites (DeepEval).
- **Software Development & Operations:** TypeScript, Node.js, Python (AsyncIO, PyTest), REST/GraphQL APIs, WebSockets, Docker, GitHub Actions, Postman, Langfuse Tracing, Linux CLI, Git.

Professional Experience

Technical Solutions Consultant & AI Systems Engineer • *Independent / AI Product Engineering Consultancy*
2024 – Present • Venice, IT (Remote / Hybrid)

- Conducted technical discovery and architecture consultations with enterprise prospects, articulating developer infrastructure capabilities and mapping product APIs to customer workflows.
- Built custom POCs and reference implementations demonstrating autonomous browser agent tool loops using Playwright, CDP, and Model Context Protocol (MCP) for complex web interactions.
- Guided prospect engineering teams through integration architecture, troubleshooting network proxies, session persistence, and dynamic DOM rendering hurdles.
- Produced detailed technical documentation, SDK usage guides, and reproducible sample repositories to streamline client developer onboarding and shorten time-to-value.
- Maintained continuous feedback loops with product and core engineering teams, channeling customer friction points into new platform features and bug fixes.

Lead Developer & Product Engineer • *FlowSpace.co*
Mar 2024 – Aug 2026 • London, UK (Remote)

- Scaled platform from 2,000 to 4,500+ active users, leading client-facing technical solutions and real-time integration architecture across European markets.
- Managed technical migrations off legacy infrastructure onto Next.js and Laravel, ensuring data integrity, minimal disruption, and seamless API interoperability.
- Built automated data ingestion and extraction pipelines aggregating unstructured partner venue data across multiple European platforms.
- Integrated external third-party booking APIs (OfficeRnD, Nexudus), handling authentication handshakes, webhook event routing, and state synchronization.
- Deployed AI customer support workflows with strict boundary guards and automated escalation routes, accelerating resolution velocity.

Full-Stack Solutions Engineer • *Tech Automation Systems*
2023 – 2024 • Milan / Remote, IT

- Delivered custom API integrations and automated backend services in Python and TypeScript, connecting client CRM, marketing, and data warehousing platforms.
- Built robust integration test suites and CI/CD pipelines in Docker, ensuring continuous operational stability for client deliverables.

- Partnered directly with non-technical business leaders and technical engineering leads to translate ambiguous workflow pain points into production software solutions.

Key Engineering Projects

- **Autonomous Browser Agent Runtime (Playwright + CDP + MCP + TypeScript):** Architected a sandboxed execution layer allowing AI agents to navigate web applications, inspect accessibility trees, execute deterministic actions, and extract structured data via CDP.
- **Automated Multi-Source Extraction Pipeline (Python + Playwright + Claude API):** Built a crawling engine processing 900+ data sources with dynamic JavaScript rendering, human review checkpoints, and automated schema enforcement.

Education, Languages & Legal Status

- **Bachelor of Arts in Philosophy, International Studies & Economics** – Ca' Foscari University of Venice (2020 – 2024)
  Rigorous foundation in formal logic, epistemology, decision theory, and complex systems analysis.
- **Languages:** English (C1 Full Professional / Fluent), Italian (Working proficiency), Hindi (Native).
- **Legal Status & Availability:** EU Long-Term Resident (Permesso di Soggiorno UE a Tempo Indeterminato, Italy). Open to international relocation to San Francisco with visa sponsorship (H-1B, O-1, etc.); available immediately.
