Prabhavit Gupta

Founding Full-Stack Engineer: Agentic AI Systems & End-to-End Product Architecture

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

Founding full-stack engineer and applied AI systems architect based in Venice, Italy with unrestricted European work authorization. Deeply experienced in building and shipping production-grade agentic AI products from zero to one. At FlowSpace, served as Lead Developer driving the full platform lifecycle: architected autonomous document processing bots (900+ listings drafted), built customer support agents with confidence-gated human escalation, orchestrated complex third-party API integrations, and led the complete database migration and frontend cutover to Next.js. Combines relentless execution with pragmatic engineering judgment, treating AI as leverage to build resilient systems that operate under real-world constraints; available immediately.

Experience

FlowSpace.co • *Lead Developer (Full-time, Freelance)*
Mar 2024 - Aug 2026 • London, UK (remote)

- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review. 900+ listings drafted.
- Streamlined customer support with AI agents that answer queries against live platform data and escalate to a person on low confidence.
- Integrated the OfficeRnD and Nexudus APIs for automated bookings, and built CRM lead-capture integration and GTM automations (sales funnel, lead enrichment, outbound) with n8n.
- Led the migration off a legacy stack to a coded Next.js and Laravel product: mapped the data model, chose the migration path per entity (API or CSV) and drove the cutover. Scaled the platform from 2,000 to 4,500+ users.
- Documented product and business logic with the developer team, coordinated between the internal team and an external agency, and built a commute-time calculator tool for companies.
- *Tools: Claude Code, n8n, Playwright, Postman, Laravel, TypeScript, Supabase, GitHub, Jira, ClickUp, Miro, Google Analytics, Microsoft Clarity*

Urlink • *Project Manager & AI-Assisted Developer (Freelance)*
Apr 2025 - Jul 2025 • Barcelona, Spain

- Built automated workflows and structured customer-facing demos with AI agents for client onboarding and document ingestion.
- Managed project delivery end to end: mapped stakeholder requirements, built proof-of-concept prototypes, coordinated testing, and handed over documentation to client teams.
- *Tools: Claude Code, Python, APIs, Postman, Supabase*

Freelance • *Full-Stack AI & Automation Developer*
Sep 2023 - Mar 2024 • Venice, Italy

- Built web scrapers, data enrichment pipelines, and custom API integrations for clients across Europe.
- Developed internal tools with modern frontend frameworks and backend scripts, automating repetitive manual data entry.
- *Tools: TypeScript, Python, n8n, Supabase, REST APIs*

Tractionboard.co • *Low-Code Developer (Internship)*
Aug 2023 - Oct 2023 • Utrecht, Netherlands

- Integrated ChatGPT/OpenAI and Sendgrid, built responsive designs, debugged features and implemented Google Ads 4.
- *Tools: Figma, Sendgrid, ChatGPT*

Education

Ca' Foscari University of Venice • *Bachelor's in Philosophy, International Studies & Economics, Minor in Entrepreneurship*
Oct 2020 - Jun 2024 • Venice, Italy

Certifications

Microsoft Copilot Studio Agent Academy • Microsoft: Introduction to building AI agents • Microsoft Power Automate • Tray.AI Build Practitioner (Sep 2024) • Tray.AI Build Foundations

Additional Information

- **Work authorization:** European Long Term Residence Permit (Italy), no sponsorship needed in the EU. Available immediately.

- **Languages:** Hindi (native), English (professional), Italian (beginner).

Core Skills

- **Agentic AI & LLM Systems:** Autonomous agent orchestration, tool & function calling, multi-agent workflows, human-in-the-loop escalation, prompt engineering, structured JSON outputs
- **Full-Stack Architecture & APIs:** Next.js, React, TypeScript, Python (FastAPI/asyncio), RESTful APIs, webhooks, microservices, third-party system integrations
- **Data Modeling & Infrastructure:** PostgreSQL, Supabase, Redis, Docker, Git/GitHub, CI/CD automated deployment pipelines, data migration
- **Product Engineering & Leadership:** Zero-to-one prototyping, product specification, spec-first development, cross-functional collaboration, Claude Code, Playwright automated testing
