Application: AI & Automation Specialist, MakesYouLocal (Copenhagen, Denmark)

Dear MakesYouLocal Hiring Team,

I am applying for the AI & Automation Specialist role. Understanding a team's problem, reading the API documentation, building the workflow or script, and checking that the people it is for actually use it is how I have worked for the past three years.

As Lead Developer at FlowSpace I streamlined customer support with AI agents, built n8n and Make workflows for lead routing, data sync and support queries, and integrated the OfficeRnD and Nexudus APIs end to end for automated bookings (OAuth2, webhooks, location sync). I built a Python pipeline that uses the Claude and OpenAI APIs to extract structured data with human review, which added 900+ listings. I build with Claude Code, test requests and JSON with Postman, and have also used Zapier. I facilitated communication between our internal team and an external agency, which meant explaining what we needed and why to people with different levels of technical background.

On the gaps: my experience is in coworking and B2B platforms rather than e-commerce or customer service operations, and I have not integrated webshop platforms such as Shopify. I do not speak Danish; I work in English (C1).

I am based in Venice, hold a European Long Term Residence Permit (no sponsorship needed in the EU), and am available immediately. I am open to relocating to Copenhagen. Thank you for considering my application.

Kind regards,
Prabhavit Gupta
