Application: AI Automation Engineer, PromptPartner (remote, Europe)

Dear PromptPartner Hiring Team,

I am applying for the AI Automation Engineer role. Turning manual business workflows into agents and automations that real teams depend on is what I have been doing for the past three years.

As Lead Developer at FlowSpace I built a Python pipeline that scrapes source data and uses the Claude and OpenAI APIs with structured outputs to extract listings, with a human review step deciding what reaches the platform; it added 900+ listings. I built AI agents that handle customer support queries against live platform data, n8n and Make workflows for lead routing and data sync, a listing sync pipeline across 9 operators with staged approval and dry-run safety, and CRM and booking integrations with the OfficeRnD and Nexudus APIs (OAuth2, webhooks). I work with the Claude API, Claude Code, MCP, function calling, TypeScript and Python, and I hold the Microsoft Copilot Studio Agent Academy and Tray.ai Build Practitioner certifications.

On the gaps: I have not deployed local or self-hosted LLMs, and my RAG work has not gone deep into chunking, embeddings, vector stores or retrieval evaluation. I use MCP but have not built and operated MCP servers or a gateway in production, and I have not built a full agent harness with memory and evaluation loops; my output checks have been human review steps. My Python is scripting, automation and AI API work rather than production backend engineering, and I have not worked with ERP systems or Docker and CI/CD in production. My degree is in Philosophy, International Studies and Economics, not computer science.

I am based in Venice, hold a European Long Term Residence Permit (no sponsorship needed in the EU), and am available immediately. I am happy to work fully remote on CET and to travel for meetups and client work. Thank you for considering my application.

Kind regards,
Prabhavit Gupta
