Prabhavit Gupta

Software Engineer | Agent Systems, LangGraph, LLM Observability & GTM Automation

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (EU Permanent Resident | Remote EU / Global Relocation Ready)

Executive Summary

- **Agent Systems & GTM Automation:** Software engineer with 3 years commercial software experience architecting production AI agents, autonomous workflow graphs, and high-leverage tooling that automate go-to-market workflows, lead qualification, and customer support.
- **Graph Orchestration & Model Mechanics:** Hands-on background designing stateful agent execution loops, LangGraph graphs, Model Context Protocol (MCP) integrations, structured outputs, prompt-caching strategies, and cross-model routing across Claude and GPT architectures.
- **Production Observability & Automated Evals:** Experienced in running comprehensive evaluation harnesses (LLM-as-judge scoring, regression tracking with Langfuse and DeepEval), monitoring latency percentiles, and catching silent execution failures before deployment.

Technical Skills & Core Competencies

- **Agent Engineering & Graph Systems:** Agent Systems, LangGraph, LangChain, Deep Agents, Model Context Protocol (MCP), Stateful Tool Calling, Autonomous Agent Loops, Prompt Engineering, Prompt Caching.
- **LLM Observability & Evals:** Trace Diagnostics, Langfuse, LangSmith, LLM-as-Judge Evals, Regression Suites (DeepEval), Cost & Latency Tracking, Structured Outputs (Pydantic, Zod).
- **Core Engineering:** Python (AsyncIO, FastAPI, PyTest), TypeScript, Node.js, Next.js, Laravel, REST APIs, SQL (PostgreSQL, Supabase, SQLite), Docker, Git.
- **GTM Automation & Integration:** CRM Integrations, Webhook Event Routing, Slack Bot Services, Lead Enrichment Workflows, Postman, GitHub Actions, CI/CD, Linux CLI.

Professional Experience

AI Systems Engineer & Agent Automation Consultant • *Independent Consultancy*
2024 – Present • Venice, IT (Remote / Hybrid)

- Designed and deployed production AI agent systems and autonomous workflows connecting enterprise CRM, messaging, and database environments.
- Architected stateful multi-agent execution loops with deterministic tool validation and automated fallback routes using TypeScript and Python.
- Built Model Context Protocol (MCP) client and server harnesses enabling agents to securely execute live data queries and trigger operational workflows.
- Implemented continuous observability and tracing with Langfuse, tracking token utilization, latency percentiles, and schema conformance across hundreds of production runs.
- Developed automated evaluation suites with LLM-as-judge scoring, turning edge-case production failures into regression tests to prevent regression cycles.

Lead Developer & Product Engineer • *FlowSpace.co*
Mar 2024 – Aug 2026 • London, UK (Remote)

- Led platform engineering and GTM automation, scaling user base from 2,000 to 4,500+ active members across European tech hubs.
- Built autonomous lead enrichment and sales funnel automations, capturing inbound interest, parsing unstructured inquiries, and syncing records directly to CRM.
- Deployed automated conversational customer support agents integrated with live booking databases, reducing ticket resolution time while maintaining high quality.
- Migrated core application architecture off legacy infrastructure onto Next.js and Laravel, ensuring data integrity and zero customer downtime.
- Built automated data ingestion and extraction pipelines aggregating unstructured venue inventory across multiple European platforms with validation checks.

Full-Stack Solutions Engineer • *Tech Automation Systems*
2023 – 2024 • Milan / Remote, IT

- Delivered custom backend microservices and API integrations in Python and TypeScript, connecting disparate data systems.
- Built automated integration test suites and Docker CI/CD pipelines, establishing high deployment reliability.
- Collaborated directly with business end-users to translate manual operational workflows into reliable software tools.

Key Engineering Projects

- **Autonomous Tool-Calling & Evaluation Harness (TypeScript + MCP + Langfuse):** Architected an execution harness enabling LLMs to safely invoke external tools, validating payloads against strict schemas with automated tracing and regression metrics.
- **Automated Multi-Source Extraction Pipeline (Python + Playwright + Claude API):** Built a crawling engine processing 900+ data sources with dynamic JavaScript rendering, human review checkpoints, and automated schema enforcement.

Education, Languages & Legal Status

- **Bachelor of Arts in Philosophy, International Studies & Economics** – Ca' Foscari University of Venice (2020 – 2024)
  Rigorous foundation in formal logic, epistemology, decision theory, and complex systems analysis.
- **Languages:** English (C1 Full Professional / Fluent), Italian (Working proficiency), Hindi (Native).
- **Legal Status & Availability:** EU Long-Term Resident (Permesso di Soggiorno UE a Tempo Indeterminato, Italy). Available immediately for Remote (EU / worldwide) or international relocation with visa sponsorship.
