Prabhavit Gupta

Forward Deployed Engineer: Enterprise Integration, Systems Architecture & Automation

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy (Remote Europe / Ready for Travel)

Summary

Forward Deployed Software Engineer and Lead Developer with 3 years of hands-on production experience leading customer onboarding, designing bespoke integration connectors, and architecting automated full-stack software. Proven track record embedding directly with operational teams and executive stakeholders to map complex multi-step enterprise workflows, eliminate implementation friction, and deliver hardened production integrations in rapid turnaround cycles. Deep technical fluency in Python, TypeScript, Node.js, RESTful API design, ETL pipelines, and relational datastores (PostgreSQL), with practical expertise in applied AI: schema-enforced tool calling, automated evaluation over real production execution traces, and deterministic validation guardrails. Passionate about owning the technical customer lifecycle from discovery through implementation to long-term reliability. Holder of EU Long-Term Residence Permit (permanent unrestricted EU work authorization without visa sponsorship); based in Venice, Italy and ready for frequent customer site travel across Europe and globally.

Technical Expertise

- **Forward Deployed & Customer Engineering:** Fast discovery cycles, enterprise workflow mapping, translating complex operational requirements into scoped technical deliverables, live stakeholder demos, integration runbooks.
- **Integration & Backend Stack:** Python (FastAPI, script automation), TypeScript, JavaScript, Node.js, RESTful APIs, webhook synchronization architectures, enterprise auth patterns.
- **Data Pipelines & Relational Integrity:** PostgreSQL, Prisma, Supabase, schema design & migrations, ETL/ELT transformations, structured JSON extraction and validation, Redis caching.
- **Applied AI & Agent Automation:** Multi-step agent orchestration, schema-enforced tool calling, LLM grounding against live databases, guardrails, fallback escalation workflows, production evaluation loops.
- **DevOps & System Ownership:** Docker containerization, AWS/GCP cloud environments, CI/CD automated deployment pipelines, Git, workflow automation (n8n), logging and trace observability.
- **Languages & Authorization:** English (C1 Professional), Hindi (Native), Italian (Beginner). EU Long-Term Residence Permit (permanent unrestricted EU work authorization, no visa sponsorship required).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer & Integration Architect *London, UK (remote)*

- Architected, deployed, and maintained the production AI customer support agent runtime on a live platform serving 4,500+ active users, automating customer inquiries across pricing, venue inventory, and bookings.
- Grounded agent responses against live operational databases and partner APIs (OfficeRnD, Nexudus) using strict JSON tool schemas and fallback escalation logic that routed complex inquiries to staff.
- Built automated evaluation loops analyzing real customer conversation transcripts rather than synthetic benchmarks, systematically detecting failure patterns and eliminating hallucinated answers.
- Profiled latency and API token consumption across model versions, optimizing prompt templates and context window utilization to reduce inference costs while maintaining rapid response times.
- Deployed automated end-to-end regression test suites using Playwright, verifying API contracts and continuous deployment stability across end-to-end customer booking flows.
- Spearheaded platform migration from legacy architecture to a modern Next.js and backend service stack, supporting platform growth from 2,000 to 4,500+ users without operational degradation.
- Built automated data ingestion and transformation pipelines parsing and validating unstructured partner listings, expanding platform inventory to over 900 locations.

Urlink **Apr 2025 - Jul 2025**
Project Manager & Solutions Developer (Freelance) *Barcelona, Spain (remote)*

- Architected core web application backend workflows, defining clear API contracts, relational schemas, and data transformation logic for client-facing features.
- Implemented automated validation and synchronization pipelines connecting third-party services with PostgreSQL, preventing malformed inputs and ensuring relational data integrity.

- Integrated automated CI/CD workflows and regression checks to accelerate feature delivery across distributed development environments.

Independent Technical Consultant **Aug 2023 - Feb 2024**
AI Solutions & Automation Engineer *Venice, Italy*

- Designed and delivered bespoke AI automation workflows, web extraction engines, and API integrations for European SME clients using Python, TypeScript, and Playwright.
- Translated manual, fragmented business operations into automated software solutions with structured logging, retry queues, and reliable recovery logic.
- Engineered webhook listeners and real-time synchronization pipelines across CRM platforms, operational tools, and relational datastores.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous grounding in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
