Forward-Deployed Engineer with hands-on experience bridging technical solutions and client needs. At FlowSpace and on independent projects like Urlink, I have successfully translated ambiguous customer requirements into scalable integrations and automated workflows. With a strong track record of building cross-functional processes and managing client-driven implementations end-to-end, I am well-prepared to guide a team of embedded engineers at ID.me, ensuring seamless customer integrations and actionable product feedback.

Core Competencies

- **Cross-functional Coordination:** Bridging communication between customers, product management, and engineering teams to resolve complex deployment issues.
- **Customer Integration:** End-to-end implementation of client-driven logic, APIs, and workflow automations tailored to real-world edge cases.
- **Process Automation:** Building repeatable integration processes, intake templates, and support workflows using automation platforms (n8n, Tray.AI) and AI tools.
- **Technical Project Management:** Managing technical requirements directly with clients, steering architectural migrations, and mentoring project contributors.
- **Systems Engineering:** TypeScript, JavaScript, Next.js, Python, Laravel, REST APIs, and webhook orchestration.

Professional Experience

FlowSpace.co **London, UK (Remote)**

Full-Stack & AI Engineer (Freelance) *Mar 2024 - Aug 2026*

- Acted as the technical connective tissue between the internal product team, external agencies, and direct customers to resolve complex deployment and integration issues end-to-end.
- Designed repeatable business processes and CRM/GTM automations with n8n, integrating multiple external platforms to scale customer operations and intake flows.
- Led the migration of a live marketplace to a Next.js and Laravel stack, ensuring a seamless data and operational transition for 4,500+ active users.
- Built and deployed autonomous support AI agents that diagnose customer queries against live platform data, successfully deflecting tier-1 issues and escalating complex edge cases.

Urlink **Remote**

Project Manager & AI-Assisted Developer (Freelance) *2025*

- Managed technical requirements directly with clients, translating ambiguous business needs into a structured development plan and successfully delivering the platform.
- Implemented client-driven automations and logic using Next.js and Supabase, building repeatable processes to accelerate future feature rollouts.

UltraStrategy **Remote**

AI Automation Developer (Freelance) *2024 - 2025*

- Engineered scalable data extraction workflows using LLMs and n8n to streamline onboarding and data management for multiple client profiles.

Clubee.com **Foetz, Luxembourg (Remote)**

Developer & QA (Freelance) *Sep 2023 - Aug 2024*

- Diagnosed integration challenges and conducted rigorous QA across the Clubee API, ensuring stable functionality and reliable performance for end users.

Get2Germany.com **Berlin, Germany (Remote)**

Developer & Automation Specialist (Part-time) *Jan 2024 - May 2024*

- Built automated tooling and integrated Google APIs to streamline backend processes and optimize database performance.

Education

Ca' Foscari University of Venice **Venice, Italy**

BA Philosophy, International Studies & Economics (Minor: Entrepreneurship) *Oct 2020 - Jun 2024*

Certifications

- **Microsoft Copilot Studio Agent Academy**
- **Tray.AI Build Practitioner** (Sep 2024)
