Prabhavit Gupta

Venice, Italy
+39 351 610 7807 • prabhavitg@gmail.com • LinkedIn, GitHub

Pragmatic, product-minded AI Engineer experienced in building and deploying LLM pipelines, agentic workflows, and document extraction systems into production. Proven track record of orchestrating multi-step AI agents, implementing RAG with vector databases, and engineering robust features across the Next.js, TypeScript, and Supabase stack. High-agency executor who thrives in fast-moving startups, taking end-to-end ownership to translate complex product problems into reliable AI-native features alongside founding teams.

Core Competencies

- **AI & Agentic Workflows**: Multi-step agent orchestration, tool use, structured outputs, RAG, embeddings, vector search (Mastra, LangChain, Anthropic/OpenAI APIs), observability, prompt evaluation, and AI-native pipelines.
- **Product Engineering (TypeScript)**: Next.js, React, Node/Deno, integrating AI-native features directly into core product stacks, low-latency API integration, robust system architecture, end-to-end feature ownership.
- **Data & Infrastructure**: PostgreSQL, Supabase, document extraction pipelines (invoices, reports, forms), schema mapping, zero-downtime migrations, automated testing, telemetry.
- **Startup Execution**: High-agency delivery, rapid prototyping to production, bridging ambiguity with pragmatic technical decisions, human-in-the-loop validation systems, agile/squad-based collaboration.

Professional Experience

FlowSpace.co — **London, UK (Remote)**
Full-Stack & AI Engineer (Freelance) — *Mar 2024 - Aug 2026*

- Built an end-to-end AI document extraction pipeline orchestrating multi-step LLM agents with tool use, structured output validation, and RAG to reliably parse unstructured data into production databases.
- Engineered human-in-the-loop approval workflows with strict schema validation and observability, enabling stakeholders to review and ensure the accuracy of AI outputs securely.
- Architected and maintained enterprise API integrations across booking and CRM pipelines in TypeScript, implementing robust webhook handling, retry logic, and resilient system design.
- Led the platform migration off a legacy stack onto a Next.js, Supabase, and PostgreSQL stack, executing a zero-downtime cutover while scaling the user base from 2,000 to over 4,500 active users.

Client Engagements — **Remote**
AI Solutions & Forward Deployment Projects — *Jan 2024 - Jul 2025*

- **Urlink** (Apr 2025 - Jul 2025): Worked directly with client leadership to map product requirements and deploy automated backend logic and AI workflows using Next.js and Supabase.
- **UltraStrategy** (Dec 2024 - May 2025): Engineered an LLM-powered data extraction pipeline and document parsing tool to transform complex inputs into structured outputs, prioritizing speed and evaluation in an ambiguous environment.
- **Get2Germany.com** (Jan 2024 - May 2024): Integrated external APIs and optimized relational database queries, building end-to-end features that translated operational complexity into functional product experiences.

Education

Ca' Foscari University of Venice — **Venice, Italy**
BA Philosophy, International Studies & Economics (Minor: Entrepreneurship) — *Oct 2020 - Jun 2024*

Certifications & Additional Information

- **Certifications**: Microsoft Copilot Studio Agent Academy, Microsoft AI Agents, Microsoft Power Automate, Tray.AI Build Practitioner.
- **Location & Work Authorization**: Based in Venice/Milan (EU Long Term Residence Permit - Italy). Open to relocation to Barcelona.
- **Languages**: English (Fluent/Professional), Hindi (Native), Italian (Conversational).
