Hiring Team
Gotenna

October 1, 2026

Dear Hiring Team,

I am excited to submit my application for the Forward Deployed Engineer position at Gotenna. With a solid foundation in software engineering and a proven track record of deploying complex, AI-driven solutions in client environments, I am eager to bring my technical expertise and client-facing skills to your innovative team.

Throughout my career, I have specialized in building robust integrations and scalable data pipelines using Python and TypeScript. In my current role, I have been instrumental in bridging the gap between advanced AI capabilities and practical business needs. By developing agentic workflows and integrating LLM APIs, I have delivered solutions that significantly enhance operational efficiency for our clients. My experience in full-stack development, particularly with Next.js and Node.js, allows me to understand and contribute to all layers of an application, ensuring seamless deployment and integration.

I am particularly impressed by Gotenna's mission and the impactful technologies you are developing. The opportunity to work closely with clients, understand their unique challenges, and deploy tailored technical solutions is exactly the kind of dynamic environment in which I thrive. I am confident that my background in rapid prototyping, system integration, and proactive problem-solving makes me a strong fit for this role.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and experiences align with Gotenna's goals.

Sincerely,

Prabhavit Gupta
