Hiring Manager
Revstar

October 1, 2026

Dear Hiring Manager,

I am writing to express my strong interest in the Forward Deployed Engineer (AWS) position at Revstar. With over three years of experience building and deploying cloud-native AI solutions and data pipelines, I am excited about the opportunity to help Revstar's clients leverage modern technology to solve complex problems.

In my current role, I have successfully designed and implemented robust backend architectures using Python and deployed them on AWS. I have extensive experience with services like Lambda, ECS, and DynamoDB, enabling me to build scalable and efficient systems. Moreover, my work involves close collaboration with clients, translating their business requirements into technical solutions and ensuring seamless integration. I am also proficient in developing intuitive frontend interfaces using Next.js and TypeScript, allowing me to deliver end-to-end solutions.

Revstar's focus on innovative, cloud-based applications aligns perfectly with my background in deploying agentic workflows and AI models into production environments. I am particularly drawn to the client-facing aspect of this role, where I can utilize my strong communication skills to drive successful project outcomes.

Thank you for considering my application. I look forward to the possibility of discussing how my technical expertise and client-focused approach can contribute to the success of Revstar's projects.

Sincerely,

Prabhavit Gupta
