Pragmatic Forward Deployed Engineer with a strong track record of orchestrating multi-step LLM agents and building production-ready AI pipelines from zero. I excel at bridging the gap between core engineering and client leadership, rapidly prototyping in ambiguous environments, and delivering resilient software across the Python, TypeScript, and SQL stack. Accustomed to context-switching between technical execution and business requirements to ship custom enterprise solutions.

Core Competencies

- **Forward Deployed Engineering**: Client-facing deployment, requirements mapping with stakeholders, rapid prototyping, translating complex systems for non-technical leadership.
- **AI & LLM Orchestration**: Anthropic/OpenAI APIs, multi-step agents, RAG, structured JSON parsing, prompt engineering, human-in-the-loop review systems.
- **Full-Stack & Systems**: Python, TypeScript, Node.js, Next.js, React, REST/GraphQL APIs, low-latency integrations, automated testing, resilient architecture.
- **Data & Infrastructure**: PostgreSQL, SQL, Supabase, data schema mapping, zero-downtime migrations, secure deployments (AWS/GCP environment exposure).

Professional Experience

FlowSpace.co **London, UK (Remote)**

Full-Stack & AI Engineer (Freelance) *Mar 2024 - Aug 2026*

- Built an end-to-end AI document extraction pipeline orchestrating multi-step LLM agents with tool use, structured output validation, and RAG to ingest client data safely into production databases.
- Designed human-in-the-loop approval workflows with strict schema validation, enabling non-technical stakeholders to review and approve AI outputs securely and efficiently.
- Architected and maintained enterprise REST/GraphQL API integrations across CRM pipelines, implementing robust webhook handling, retry logic, and rate limiting for high reliability.
- Led the platform migration off a legacy stack onto a coded Next.js and Laravel stack, mapping data schemas and executing zero-downtime cutover while scaling the user base to 4,500+ users.

Client Engagements **Remote**

Forward Deployed Engineer Projects *Jan 2024 - Jul 2025*

- **Urlink** (Apr 2025 - Jul 2025): Embedded with client leadership to map operational requirements, architect platform logic from zero, and deploy automated workflows using Next.js and Supabase.
- **UltraStrategy** (Dec 2024 - May 2025): Engineered an LLM-powered data extraction pipeline and document parsing tool, prioritizing rapid iteration and adaptability in a fast-moving enterprise context.
- **Get2Germany.com** (Jan 2024 - May 2024): Integrated complex external APIs and optimized SQL database queries, translating technical constraints into highly functional tools for end-users.

Education

Ca' Foscari University of Venice **Venice, Italy**

- *BA Philosophy, International Studies & Economics* *Oct 2020 - Jun 2024*
  Minor: Entrepreneurship

Certifications & Additional Information

- **Certifications**: Microsoft Copilot Studio Agent Academy, Microsoft AI Agents, Tray.AI Build Practitioner.
- **Work Authorization**: EU Long Term Residence Permit (Italy). Active freelance professional setup.
- **Languages**: English (Fluent/C1), Hindi (Native), Italian (Beginner).
