Laura Santamaría Rodríguez
Zurich Insurance (ServiZurich)
Via Augusta, Barcelona, Spain

October 1, 2026

Dear Laura Santamaría Rodríguez,

I am writing to express my strong interest in the AI & Process Automation Engineer position at ServiZurich. With hands-on expertise in developing production-grade automation solutions using Python, Claude, and Microsoft Copilot Studio, I am well-prepared to help modernise and scale business processes across your Investment, Administration, and Accounting (IAA) units.

In my recent role as Lead AI Developer at FlowSpace.co, I architected workflow automations and AI agents that significantly reduced manual triage and resolution times. I designed data extraction pipelines with Claude, ensuring appropriate human-in-the-loop controls and auditable governance—a critical requirement for regulated enterprise environments like Zurich Insurance. Furthermore, my certification in the Microsoft Copilot Studio Agent Academy aligns directly with your need to leverage low-code platforms to build reusable patterns and empower non-engineering teams.

I excel at translating complex business requirements into maintainable, version-controlled technical solutions. I am particularly drawn to ServiZurich because of your commitment to responsible AI and scalable digitisation. The opportunity to act as the technical interface between business teams and the digitisation capability perfectly matches my background in driving project-based transformation.

I am highly flexible and prepared to embrace the hybrid work model in Barcelona. Thank you for considering my application. I look forward to discussing how my blend of automation engineering and AI-assisted tooling can accelerate ServiZurich's strategic digitisation roadmap.

Sincerely,

Prabhavit Gupta
