Accenture España
Hiring Team - Forward Deployed Engineer

Dear Hiring Manager,

I am writing to express my strong interest in the Forward Deployed Engineer position at Accenture España. With a robust background as a Full-Stack and AI Engineer, I specialize in bridging complex technical challenges with tangible business value. Your focus on building and deploying scalable AI solutions directly for clients aligns perfectly with my hands-on experience in engineering production-ready agentic systems and migrating platforms to modern architectures.

In my recent role as Lead Developer at FlowSpace.co, I owned the product and its AI features from end to end. I successfully directed the live migration of our marketplace from a legacy stack to a modern Next.js and Laravel architecture, directly enabling our scale from 2,000 to over 4,500 users. To accelerate growth, I architected and deployed a production AI listing bot that processes multi-format documents into structured listings, fully integrating a human-in-the-loop workflow.

Here is how my experience maps to your needs:

- **Applied AI Solutions**: Built and maintained support AI agents using Claude, n8n, and Eden AI that process live platform data, correctly implement confidence-based escalation, and automate complex tasks.
- **Client-Centric Engineering**: Consistently collaborated with internal teams and external agencies to translate business requirements into technical deliverables, resolving critical customer issues across European markets.
- **End-to-End Delivery**: Shipped full-stack features, third-party API integrations, and CRM automations that drive operational efficiency and solve real-world problems.

Accenture's commitment to accelerating AI adoption, especially through your initiatives and partnerships with Google Cloud, is exactly the environment where I thrive. I bring not only the technical rigor to build these systems, but the business acumen to ensure they drive measurable impact for your clients. I am eager to bring my expertise in deploying AI agents to your forward-deployed engineering teams.

Thank you for your time and consideration. I look forward to the possibility of discussing how my skills and experiences align with the goals of Accenture España.

Kind regards,
