October 1, 2026 Dear Accenture Reinvention Deployment Engineering Team,

I am writing to express my strong interest in the Forward Deployed Engineer position (Req R00345180) at Accenture. Having built and deployed production agentic solutions, multi-provider LLM pipelines, and end-to-end automation workflows, I am eager to embed directly with client engineering teams to make complex AI platforms deliver measurable, production-grade business outcomes.

As an engineer who focuses on production velocity, adoption, and time-to-value rather than theoretical prototypes, my background directly aligns with your core mission:

- **Production Agentic Solutions & Context Engineering:** Experienced designing and operationalizing agentic workflows, multi-agent coordination (LangChain/LangGraph, MCP), RAG architectures, and multi-provider abstraction layers (Anthropic Claude, OpenAI, Azure OpenAI).
- **Rapid Time-to-Value & Deployment Ownership:** Proven track record moving from ambiguous business challenges to hardened production systems in tight cycles—implementing structured data pipelines, automated error handling, dead-letter retries, and API integrations.
- **Enterprise Integration & Stack Governance:** Certified in Microsoft Copilot Studio and Power Automate, with extensive hands-on experience bridging modern Python/TypeScript cloud-native backends with enterprise platforms.
- **Client-Embedded Delivery & Value Communication:** Adept at collaborating across technical teams and executive stakeholders to translate architectural decisions into quantifiable business impact, adoption metrics, and reusable client-owned playbooks.

I hold a European Long-Term Residence Permit with full legal authorization to work across Spain and the EU without requiring visa sponsorship. I am fully available for travel, on-site client embedding, and remote collaboration.

I welcome the opportunity to discuss how my hands-on deployment mindset and agentic engineering skills can contribute to Accenture's FDE practice. Thank you for your consideration.

Kind regards,

Prabhavit Gupta
