BICE VIDA
Gerencia de Sistemas
Santiago, Chile (Remote / Relocation)

Subject: Application for Developer Full Stack - Tribu Producto

Dear Hiring Manager,

I am writing to express my strong interest in the Developer Full Stack position within the Tribu Producto at BICE VIDA. With over three years of experience building end-to-end web applications and a proven track record of using Angular, .NET, and SQL Server, I am excited about the opportunity to contribute to BICE VIDA's digital transformation and deliver high-impact digital products.

In my recent roles, I have specialized in analyzing, designing, and integrating technological solutions that meet stringent business requirements. My core technical stack perfectly aligns with your needs: I am highly proficient in constructing robust REST services, developing dynamic user interfaces with Angular, and managing complex databases in SQL Server. Furthermore, I have hands-on experience deploying solutions using AWS and Docker, enabling scalable and reliable infrastructure.

Beyond my technical skills, I am deeply committed to Agile methodologies and continuous improvement. I thrive in high-performance, collaborative teams and have consistently contributed to functional testing, incident resolution, and code quality reviews. Your focus on security, prosperity, and protection resonates with my dedication to building reliable and secure applications that empower users.

I would welcome the opportunity to discuss how my technical expertise and collaborative approach can help BICE VIDA continue to innovate and succeed. Thank you for considering my application. I look forward to the possibility of an interview.

Sincerely,

Prabhavit Gupta
