Hiring Manager
CoverYou
Delhi, India (Remote/Hybrid)

Dear Hiring Manager,

I am writing to express my strong interest in the Full Stack Developer position at CoverYou. With my background in architecting end-to-end web applications and my recent focus on integrating generative AI tools into production environments, I am excited about the opportunity to contribute to CoverYou's innovative platform.

In my recent roles as a Full Stack Developer, I have built and maintained robust internal portals, dashboards, and APIs using modern frameworks (React.js, Node.js, Python, and .NET Core) alongside both SQL and NoSQL databases. One of my key strengths is leveraging AI coding tools (such as Claude Code and OpenAI) to rapidly prototype, iterate, and deploy features. I have also successfully integrated LLMs (OpenAI, Claude, Gemini) directly into client products to automate complex workflows, aligning perfectly with your requirement for AI-driven development.

Moreover, I have experience working directly with business operations and founders to translate high-level requirements into scalable software solutions. As your product roadmap grows, my background in mobile development using React Native positions me well to support CoverYou's cross-platform initiatives. I am highly focused on writing well-documented, tested, and cleanly deployed code.

I am particularly drawn to CoverYou because of your forward-thinking integration of AI into the product lifecycle. I would welcome the opportunity to discuss how my technical skill set and rapid prototyping abilities can help your team ship features quickly and reliably.

Thank you for your time and consideration. I look forward to the possibility of discussing this role with you.

Sincerely,

Prabhavit Gupta
