Ramdas Gavit
Delphie Consulting Services
Chennai, India

Subject: Application for Generative AI Specialist

Dear Ramdas Gavit and the Hiring Team,

I am writing to express my strong interest in the Generative AI Specialist position at Delphie Consulting Services. With over 5 years of overall experience in Machine Learning and Deep Learning, alongside 2+ years of dedicated hands-on experience in Generative AI and LLM solution development, I am well-prepared to contribute effectively to your AI initiatives.

In my recent projects, I have successfully built and deployed multiple live GenAI solutions. I have deep expertise in developing enterprise chatbots and knowledge-search systems using RAG architectures backed by vector databases like FAISS, ChromaDB, and Pinecone. Furthermore, I have leveraged frameworks like LangChain and Hugging Face Transformers to orchestrate agentic workflows powered by state-of-the-art models including OpenAI, Claude, Llama, and Mistral.

Beyond API integrations, my technical background includes fine-tuning open-source models using PEFT/LoRA to achieve high performance on domain-specific NLP tasks without the overhead of full-parameter training. I am also highly proficient in Python and PyTorch, and I have hands-on experience deploying these robust ML/DL solutions to AWS infrastructure.

I am excited about the opportunity to bring my background in building end-to-end GenAI pipelines to Delphie Consulting Services. While I am currently based in Italy, I am open to discussing how my experience can align with your operational model and needs in Chennai.

Thank you for considering my application. I look forward to discussing how my skills and live project experiences make me a strong fit for this role.

Sincerely,

Prabhavit Gupta
