Hiring Manager
Expedia Group

Subject: Application for Software Development Engineer II

Dear Hiring Manager,

I am writing to express my strong interest in the Software Development Engineer II position at Expedia Group. With a comprehensive background in building scalable distributed systems, developing robust APIs, and optimizing high-throughput services, I am eager to bring my technical expertise to help power global travel experiences at Expedia.

Throughout my career, I have consistently focused on delivering impactful backend solutions. At Tech Solutions S.p.A., I architected and maintained microservices capable of processing over 50,000 requests per minute with sub-second latency. I also led the migration of legacy monolith applications to Docker and Kubernetes, reducing infrastructure costs by 30% and greatly improving deployment frequency. This experience aligns well with the complexities of scaling applications on cloud platforms, a challenge I understand is core to the SDE II role at Expedia Group.

Furthermore, my experience in collaborating with cross-functional teams and integrating third-party APIs has taught me the importance of clear communication and end-to-end system reliability. I am adept at working in Agile environments and have successfully driven best practices in testing, CI/CD, and code reviews.

I am excited about the opportunity to contribute to Expedia Group's mission of bringing the world within reach through technology. I am confident that my technical background in distributed systems and my passion for problem-solving make me a strong fit for your team.

Thank you for considering my application. I have attached my CV and look forward to the possibility of discussing how I can contribute to the continued success of Expedia Group.

Sincerely,

Prabhavit Gupta
