Fujitsu
Hiring Team
De Meern, Netherlands

Dear Fujitsu Hiring Team,

I am writing to express my strong interest in the Forward Deployed Manager role within Fujitsu's AI transformation practice. With a background in both rapid technical prototyping and direct client engagement, I specialize in bridging the gap between ambiguous enterprise problems and scalable AI solutions. My experience embedding directly with clients to move AI from concept to production aligns perfectly with Fujitsu's mission to deliver enterprise-grade AI systems.

In my recent freelance work as a Full-Stack and AI Engineer for FlowSpace, I led the end-to-end delivery of AI data pipelines orchestrating multi-step LLM agents. By embedding with customer teams, I translated business requirements into technical architectures that drove rapid time-to-value.

Here is how my experience maps to the needs of the Forward Deployed Manager role:

- **Client-Facing Delivery:** Managed stakeholder expectations and cross-functional requirements, ensuring technical solutions accurately reflected business needs.
- **Enterprise AI Integration:** Built secure, agentic pipelines using Anthropic and OpenAI models that integrated seamlessly with legacy CRM and booking systems.
- **Governance and Security:** Designed strict human-in-the-loop workflows with schema validation, empowering non-technical stakeholders to review and deploy AI outputs safely.

What excites me most about Fujitsu is your commitment to navigating the complex intersection of engineering and consulting to deliver tangible AI value. The Netherlands offers a dynamic market for these transformations, and I am eager to bring my hands-on engineering background and project management skills to your Benelux team.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my blend of technical and managerial expertise can contribute to Fujitsu's AI initiatives. I look forward to hearing from you.

Kind regards,

Prabhavit Gupta
