Hiring Team
HCLSoftware

Subject: Application for Forward Deployed Engineer

Dear Hiring Team,

I am writing to express my strong interest in the Forward Deployed Engineer position at HCLSoftware. With a robust background in developing and integrating Agentic AI platforms, alongside extensive experience in creating production-ready solutions for enterprise environments, I am excited about the opportunity to help HCLSoftware's clients maximize the ROI of their AI investments.

In my recent role as Lead AI Developer at FlowSpace.co, I architected and deployed an AI-powered Listing Bot using TypeScript and Claude, which functions as an agentic AI solution for processing unstructured data. I successfully led the end-to-end migration of the live platform, scaling it to support over 4,500 active users, and engineered complex API integrations to connect our core infrastructure with external enterprise systems like OfficeRnD and Nexudus. My hands-on experience in building custom data pipelines, troubleshooting edge cases in production, and collaborating directly with stakeholders to conduct technical discovery perfectly aligns with the responsibilities of the Forward Deployed Engineer role.

What draws me to HCLSoftware is your commitment to pioneering enterprise AI solutions within the Incubation & Exploration portfolio. I understand that delivering true value requires not just advanced ML models, but the ability to seamlessly embed those capabilities into legacy and modern client infrastructures. Throughout my freelance projects, including developing an AI-native platform for Urlink and an automated pipeline for UltraStrategy.com, I have consistently acted as both a technical integrator and a subject matter expert. I excel in translating complex requirements into reliable automation scripts, robust REST APIs, and intuitive AI workflows.

I am eager to bring my expertise in LLMs, workflow automation, and enterprise integration to HCLSoftware, ensuring your Agentic AI platforms deliver exceptional, customized results for your clients. I look forward to the possibility of discussing how my technical skills and client engagement experience can contribute to your team.

Thank you for your time and consideration.

Sincerely,

Prabhavit Gupta
