LHH Recruitment Team
LHH (for Primario Gruppo Assicurativo Italiano)
Rome, Italy (Hybrid)

Dear Hiring Team at LHH,

I am writing to express my strong interest in the Software Engineer - Java & AI position for the prominent Italian insurance group you are representing. With a solid foundation in backend development and a keen focus on integrating Artificial Intelligence into scalable architectures, I am eager to contribute to the group's internal Software Factory and help build state-of-the-art proprietary solutions.

Over the course of my career, I have developed extensive expertise in designing and maintaining robust microservices using Java and Spring Boot. I am highly proficient in containerized environments, utilizing Docker and Kubernetes to ensure software is scalable, resilient, and easily maintainable. Furthermore, my background aligns closely with the role's focus on AI and Data & Analytics, as I consistently leverage intelligent tooling and data-driven approaches to optimize backend processes and deliver high-quality code.

In my recent roles, I have taken ownership of the entire development lifecycle—from conceptual design to deployment—ensuring that solutions meet stringent quality and security standards essential for the insurance sector. I thrive in cross-functional teams and am passionate about adopting innovative technologies to solve complex problems.

I am drawn to this opportunity because it uniquely combines core enterprise backend engineering with cutting-edge AI initiatives within a leading financial institution. I am confident that my technical proficiency and problem-solving mindset make me an excellent fit for the Software Factory team.

Thank you for considering my application. I look forward to the possibility of discussing how my skills and experiences can contribute to the success of your client's technology initiatives.

Sincerely,

Prabhavit Gupta
