October 1, 2026 Dear LeoVegas Group Hiring Team,

I am writing to express my strong interest in the Process Automation Specialist role at LeoVegas Group. With deep hands-on experience in robotic process automation (UiPath), autonomous AI agents (Claude, LangChain), and custom Python API integrations, I specialize in bridging traditional RPA with modern generative AI to eliminate operational friction and optimize complex workflows.

At FlowSpace.co and across my European automation engagements, I have designed and deployed end-to-end intelligent automation architectures:

- **Intelligent Process Automation:** Architected complex workflows integrating UiPath, n8n, and custom Python scripts with enterprise APIs, databases, and third-party SaaS tools.
- **Autonomous AI Agents:** Deployed production agents utilizing Claude and LLMs with tool-calling, multi-step reasoning, and document understanding pipelines to automate customer operations and data parsing.
- **Reliability & Governance:** Led technical scoping with cross-functional stakeholders, established version control and testing best practices, and maintained live automations under high throughput.

LeoVegas's forward-thinking approach to empowering engineers to deploy intelligent workflows from scratch and explore cutting-edge agentic frameworks is the ideal environment for my background. I hold a European Long-Term Residence Permit (no sponsorship needed) and am enthusiastic about joining the team in Malta under your hybrid model.

Thank you for your consideration. I look forward to discussing how my experience can contribute to LeoVegas Group.

Kind regards,

Prabhavit Gupta
