Hiring Manager
Satispay
Milan, Italy (Hybrid)

Dear Hiring Manager,

I am writing to express my strong interest in the Software Engineer III, Backend - Consumer Growth Domain position at Satispay. As a frequent user and admirer of Satispay's digital payment ecosystem, I am excited by the opportunity to contribute to a platform that makes everyday transactions seamless for millions of users.

With extensive experience in designing and building scalable backend systems, I am well-equipped to drive user acquisition and engagement initiatives within the Consumer Growth Domain. My technical background centers on Java and Spring Boot, and I have significant experience managing relational databases such as PostgreSQL. Furthermore, I am highly proficient in utilizing AWS infrastructure, including EC2, ECS, S3, and Lambda, to support and enhance microservices architectures.

In my recent work, I have taken full ownership of the feature lifecycle, from initial architecture design to production deployment. I thrive in cross-functional, collaborative environments and consistently leverage AI tools to optimize code quality, documentation, and debugging processes. Satispay's focus on user onboarding, shop discovery, and personalized journeys aligns perfectly with my background in building reliable systems that directly impact business growth.

I am drawn to Satispay's innovative culture and the opportunity to work hybrid in Milan. I am confident that my technical skills and proactive problem-solving mindset make me an excellent fit for your engineering team. I look forward to the possibility of discussing how I can contribute to Satispay's continued expansion.

Thank you for considering my application.

Sincerely,

Prabhavit Gupta
