Hiring Manager
Sibylla S.r.l.
Roma, Italy

Dear Hiring Manager,

I am writing to express my strong interest in the Developer C#/.NET Engineer position at Sibylla S.r.l. With extensive experience in architecting and developing robust server-side solutions using C# and .NET, I am excited about the opportunity to contribute to Sibylla's innovative ecosystem for hotel management, revenue management, and distribution.

In my recent role as a Senior Backend Engineer at Tech Solutions S.p.A., I spearheaded the development of mission-critical microservices using .NET Core, successfully processing high-throughput transactions with sub-second latency. I have a proven track record of optimizing complex SQL Server databases and integrating seamless third-party APIs—skills that align perfectly with the technical demands of creating reliable, secure technologies for the hotellerie sector. Furthermore, I recognize the importance of secure, compliant systems, which resonates with Sibylla's ISO 9001 and ISO/IEC 27001 certifications.

I am particularly drawn to Sibylla's focus on revolutionizing revenue and distribution management for the hospitality industry. Having previously developed backend systems that handle sensitive booking and transactional data, I understand the critical need for performance, data integrity, and scalability in this domain.

I am confident that my technical background in C# and .NET, combined with my proactive approach to software engineering, makes me a strong fit for your team. I would welcome the opportunity to discuss how my expertise can support Sibylla S.r.l. in delivering exceptional technology solutions to your clients.

Thank you for considering my application. I look forward to the possibility of discussing this exciting opportunity with you.

Sincerely,

Prabhavit Gupta
