Subject: Application for Senior Fullstack Developer (.NET/React/Azure) Position

Dear Hiring Manager,

I am writing to express my strong interest in the Senior Fullstack Developer position at your company, as advertised through freeC. With a solid foundation in software engineering and extensive professional experience specializing in the .NET ecosystem, React.js, and Microsoft Azure, I am confident in my ability to make significant contributions to your development team.

Over the past several years, I have successfully designed, built, and deployed robust end-to-end applications that solve complex business challenges. In my current freelance practice and previous roles, I have leveraged .NET Core and C# to architect scalable backend microservices, while using React and TypeScript to craft intuitive, highly responsive user interfaces. My deep familiarity with Microsoft Azure has allowed me to seamlessly migrate applications to the cloud, optimize infrastructure, and implement efficient CI/CD pipelines.

What draws me to this opportunity is the chance to apply my full-stack expertise within an environment that values technical excellence and innovation. I thrive in cross-functional teams and am passionate about writing clean, maintainable code, mentoring peers, and driving projects from conceptualization to successful deployment.

I would welcome the opportunity to discuss how my technical skills, proactive problem-solving approach, and background in .NET, React, and Azure align with the goals of your upcoming projects. Thank you for considering my application. I have attached my resume for your review and look forward to the possibility of an interview.

Sincerely,

Prabhavit Gupta
