Hiring Team
scandiweb
Application for AI Native Go-to-Market (GTM) Specialist (Remote / Riga)

Dear scandiweb hiring team,

I am writing to express my strong interest in the AI Native Go-to-Market (GTM) Specialist position at scandiweb. Over the past two decades, scandiweb has established itself as a global digital experience leader for enterprise eCommerce brands such as Samsung, Walmart, BMW, and Puma. Your scandiweb.ai initiative, transforming AI from high-level advisory into an active operational execution layer, represents the exact future of growth. I am an AI-native builder who combines GTM systems design, automated outbound pipelines, and full-stack development to move from concept to live execution on the same day.

My background directly addresses the high-speed demands of this position:

- **High-Volume Outbound and Growth Engines:** At FlowSpace, I architected platform-to-CRM GTM automations for automated lead capture, data enrichment, and outbound messaging flows. Previously at Tractionboard, I integrated OpenAI and Sendgrid APIs to automate outbound messaging at scale. I know how to orchestrate personalized outbound workflows handling 1,000+ daily contacts while maintaining deliverability, dynamic messaging angles, and strict data hygiene.
- **Rapid Microsite and Landing Page Deployment:** I do not wait on engineering tickets to test an offer. Leveraging Next.js, TypeScript, Tailwind, Supabase, and Claude Code, I rapidly design, deploy, and instrument conversion-optimized landing pages and microsites in hours. On Urlink and FlowSpace, I turned business concepts into live web properties with analytics and lead-capture webhooks built in from day one.
- **AI-Native Daily Toolchain:** I use Claude, OpenAI APIs, n8n, and Make every day for structured prompt chaining, content generation, and autonomous workflows. At FlowSpace, I engineered an AI document pipeline that ingested unstructured brochures across four file formats to draft 900+ workspace listings with human-in-the-loop review. I build deterministic validation into automated flows so speed never compromises brand quality.
- **Conversion Psychology and Commercial Validation:** Holding a degree in Economics with an Entrepreneurship minor from Ca' Foscari University of Venice, I approach GTM through the dual lens of behavioral economics and rigorous experimentation. Whether setting up Meta campaigns, testing headline variants, or refining value propositions across international markets, I evaluate every initiative against qualified pipeline and customer acquisition metrics.

I operate with high autonomy and thrive in environments where experimentation velocity and tangible business outcomes matter most. Based in Venice, I hold an Italian European Long-Term Residence Permit, granting full European work authorization without visa sponsorship. I am fluent in English (C2) and ready to integrate immediately into your remote international team.

I would welcome the opportunity to discuss how my hands-on GTM automation systems and rapid AI execution can accelerate scandiweb's growth initiatives.

Thank you for your time and consideration.

Kind regards,
Prabhavit Gupta
