Senior Software Engineer with over 10 years of experience in designing and developing scalable architectures using C#, .NET Core, and .NET Framework. Proven track record of building microservices, integrating complex systems, and applying Object-Oriented Programming (OOP) and Design Patterns. Highly motivated to bring my expertise in robust software engineering to ADENTIS Italia's Software Product Team, contributing to innovative intralogistics solutions and the Mission Manager for AGV fleets.

Core Competencies

- **C# & .NET:** Expert-level proficiency in C#, .NET Core, .NET Framework, and WPF for developing scalable applications and desktop interfaces.
- **Architecture & Design:** Strong experience designing microservices architectures, applying Design Patterns, and adhering to advanced OOP principles.
- **Version Control & Tools:** Proficient in Git, CI/CD pipelines, and integrating software with simulation environments.
- **Problem Solving:** Exceptional analytical and problem-solving skills, proposing reliable, scalable, and sustainable technical solutions.

Professional Experience

Tech Solutions S.p.A. **Milan, Italy (Hybrid)**

Senior Backend Engineer *2021-2026*

- Architected and developed mission-critical microservices using C# and .NET Core, ensuring high reliability and scalability for complex enterprise systems.
- Designed data processing pipelines and state management solutions conceptually aligned with AGV mission management and routing logic.
- Led the migration of legacy monolithic applications to modern distributed architectures, utilizing established Design Patterns.
- Collaborated with product supervisors and R&D teams to define technical requirements and deliver innovative software solutions on schedule.
- Mentored a team of developers, enforcing software engineering best practices, robust testing, and Git versioning workflows.

Innovatech IT **Venice, Italy**

Backend .NET Developer *2017-2021*

- Developed and maintained scalable software solutions using C#, .NET Framework, and WPF for industrial and enterprise clients.
- Analyzed technical issues and implemented reliable fixes, directly supporting field engineering and customer service teams during rollout phases.
- Integrated third-party APIs and automated systems, ensuring transactional consistency across distributed industrial systems.
- Implemented automated unit testing, improving code quality and system stability.

DataCorp **Bologna, Italy**

Software Engineer *2014-2017*

- Built robust data processing applications in C# to handle large volumes of transactional data with real-time performance requirements.
- Optimized database interactions and system performance, laying the groundwork for high-availability enterprise services.

Education

University of Bologna **Bologna, Italy**

Master of Science in Computer Science *2011-2014*

Specialization in Distributed Systems and Software Architecture.

University of Bologna **Bologna, Italy**

Bachelor of Science in Computer Science *2008-2011*

Graduated with Honors.

Languages & Availability

- **English:** Fluent (Written and Spoken)
- **Italian:** Native/Bilingual
- **Availability:** Available for short-term travel (up to 30%) as required for installation and testing.
