Profile

Backend-focused Software Engineer with a strong track record of designing and deploying scalable API integrations and production systems. Experienced in architecting robust data flows and automated pipelines to serve thousands of active users in dynamic marketplace environments. While my primary languages to date have been TypeScript and Python, my background in building real-time integrations, REST APIs, and scalable architectures aligns well with the distributed systems challenges at ATG. I am highly motivated to transition into the Go ecosystem.

Core Competencies

- **Languages & Frameworks:** TypeScript, JavaScript, Python, Next.js, Node.js, Laravel (PHP)
- **Backend & Systems:** REST API Design, Webhooks, Data Modeling, Supabase, CRM integrations, robust data flows
- **Architecture & Tools:** Distributed Systems Concepts, CI/CD, Git, Docker, Postman, Playwright, production environments
- **Applied AI & Automations:** LLMs, AI Agents, workflow automation (n8n, Make), unstructured data processing

Professional Experience

FlowSpace.co **London, UK (Remote)**

Lead Developer (Freelance) *Mar 2024 - Present*

- Architected and deployed backend systems and a Listing Bot (TypeScript) that processes unstructured data sources to build structured marketplace listings, ensuring data integrity.
- Led the end-to-end migration of a live marketplace to a modern architecture (Next.js, Laravel), scaling the platform to support 4,500+ active users with high performance.
- Engineered complex REST API data flows to sync with external systems (OfficeRnD, Nexudus) and built automated pipelines for lead routing and CRM integration.
- Delivered backend automation features that optimized system performance and significantly reduced manual triage times for marketplace operations.

Urlink **Barcelona, Spain**

Project Manager & Developer (Freelance) *Apr 2025 - Jul 2025*

- Delivered an automation platform leveraging Supabase and Netlify to execute complex client-driven data flows, translating open-ended requirements into technical backend implementations.
- Managed full project lifecycle and deployment pipelines directly with stakeholders, ensuring reliable production releases.

UltraStrategy.com **France**

Automation Engineer (Collaborator) *Dec 2024 - May 2025*

- Designed and deployed a robust data extraction pipeline to serve a multi-profile user platform, optimizing performance and ensuring it operated reliably in production.

Get2Germany.com **Berlin, Germany**

Lead Developer (Part-time) *Jan 2024 - May 2024*

- Integrated Google APIs and built automation workflows to streamline data discovery and processing.

Clubee.com **Foetz, Luxembourg**

Full-Stack Developer & QA (Freelance) *Sep 2023 - Aug 2024*

- Implemented comprehensive REST API integrations and developed core domain tools for the platform.
- Contributed to high code quality standards through rigorous unit testing and continuous improvement of production systems.
- Participated in identifying and addressing technical debt to ensure high availability.

Education

Ca' Foscari University of Venice **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 - Jun 2024*

Minor in Entrepreneurship

Certifications & Languages

Work Authorization: European Long Term Residence Permit (Italy). No sponsorship required.
Languages: English (Professional), Hindi (Native), Italian (Beginner).
