Prabhavit Gupta

+39-351-610-7807 prabhavitg@gmail.com Linkedin Venice, Italy

Career Summary

- Industrial Automation Software Engineer with a mechanical engineering background and Politecnico di Milano graduate training, specializing in SCADA/HMI systems and industrial data acquisition.
- Hands-on expertise in Python scripting, SQL relational databases, and connecting supervisory control interfaces with industrial automation hardware.
- Proven track record in developing real-time operational dashboards, automated monitoring pipelines, and executing structured troubleshooting during testing and commissioning.

Technical Skills

- **Industrial Automation & SCADA** – SCADA/HMI Systems, Inductive Automation Concepts, Supervisory Dashboards, PLC Interfaces, Data Acquisition
- **Programming & Scripting** – Python, Jython, SQL, Bash, TypeScript, REST APIs, Git, Linux
- **Databases & Integration** – PostgreSQL, MySQL, Data Modeling, Real-Time Telemetry, Hardware-Software Integration
- **Engineering & Quality** – Test Automation, Commissioning Support, Root Cause Analysis, Technical Documentation, System Diagnostics

Visa & Language

- **Language** – Italian (Conversational / Intermediate), English (Fluent / Professional), Hindi (Native)
- **Work Authorization** – European Long Term Residence Permit - No Sponsorship required.

Professional Experience

FlowSpace.co — *Automation Lead Developer (Full time, Freelance)*
London, UK — *Mar 2024 – Ongoing*

- **Industrial Systems & Monitoring Architecture:**
  - Designed supervisory monitoring dashboards and real-time operational telemetry tracking distributed system health.
  - Built automated data ingestion pipelines connecting field endpoints with central PostgreSQL databases via REST APIs.
  - Developed Python scripting modules for automated data processing, anomaly detection, and event alerting.
  - Authored technical architecture specifications, interface definitions, and user manuals for engineering teams.
- **Operations & Diagnostics:**
  - Maintained 99.9% system reliability across live operational workflows through proactive error handling and automated recovery.
  - Performed root-cause diagnostic investigations on software exceptions, optimizing payload throughput by 35%.
- *Tools: Python, SQL, PostgreSQL, Linux, Docker, REST APIs, Git, Jira*

Urlink — *Systems Automation Engineer*
Milan, Italy — *Jul 2023 – Feb 2024*

- Developed data synchronization services linking connected hardware devices with supervisory relational databases.
- Implemented automated testing routines and logging frameworks to validate communication integrity across serial and network interfaces.
- Collaborated with engineering teams during commissioning and deployment phases, verifying operational parameters against technical requirements.

UltraStrategy — *Automation Developer*
Remote, Germany — *Sep 2022 – Jun 2023*

- Built automated ETL scripts extracting, transforming, and loading operational metrics into analytics databases.

- Automated diagnostic report generation, reducing manual data auditing time by 40%.

Education

Politecnico di Milano *M.Sc. in Management Engineering (Digital Business & ICT)*
Milan, Italy *2020 – 2023*

Thapar Institute of Engineering and Technology
B.E. in Mechanical Engineering
Punjab, India *2014 – 2018*
