Forward deployed AI engineer specializing in building GenAI-powered web applications and leading technical transformations. With deep expertise in modern JavaScript (React, Node.js) and Anthropic/OpenAI integrations, I work directly with clients to turn ambiguous requirements into scalable, production-ready software. Passionate about championing a delivery model where GenAI accelerates every stage of the SDLC, driving rapid time-to-value.

Core Competencies

- **GenAI & Agents:** Anthropic Claude API, GitHub Copilot, Model Context Protocol (MCP), structured output parsing, multi-step agent orchestration, and RAG pipelines.
- **Modern Web Development:** TypeScript, React, Next.js, Node.js, building reusable frontend components and scalable backend systems for complex architectures.
- **Client Engagement & SDLC:** Leading development teams, running client workshops to define technical direction, and end-to-end ownership from architecture to CI/CD deployment.

Professional Experience

FlowSpace.co **London, UK (Remote)**

Full-Stack & AI Engineer (Freelance) *Mar 2024 - Aug 2026*

- Co-led the migration of a live marketplace off a legacy stack into a robust Next.js and backend architecture, scaling the active user base from 2,000 to over 4,500.
- Built and shipped an AI data pipeline orchestrating multi-step LLM agents (Claude, OpenAI) with tool use and RAG to ingest documents across various formats into production.
- Designed strict human-in-the-loop governance workflows with schema validation, enabling safe review and deployment of AI outputs across the SDLC.
- Embedded directly into customer ecosystems to build integrations against APIs and booking systems, setting the technical direction and ensuring seamless software delivery.

Urlink **Remote**

Project Manager & Lead Developer *Jan 2025 - Dec 2025*

- Worked directly with the client to translate business requirements into a scalable platform, architecting the application logic and leading development using Next.js and Supabase.

Get2Germany.com **Berlin, Germany**

Developer & Automation Specialist *Jan 2024 - May 2024*

- Delivered rapid automation solutions integrating Google APIs and AI extraction tools to streamline workflows, acting as the technical bridge between business goals and functional code.

UltraStrategy **Remote**

AI Automation Developer *Jan 2024 - Dec 2025*

- Engineered a custom data extraction engine utilizing LLMs to streamline operations and enhance platform matching capabilities, improving processing speed and accuracy.

Education & Certifications

Ca' Foscari University **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 - Jun 2024*
Minor in Entrepreneurship.

Microsoft

Tray.AI Build Practitioner & Agent Academy *Sep 2024 - Sep 2024*
