Professional Summary

Senior Backend Engineer with strong expertise in Java, Spring Boot, and AWS cloud architecture. Proven track record in designing and implementing scalable microservices and event-driven architectures. Advanced English communication skills, with experience collaborating in global tech teams.

Technical Skills

- **Languages:** Java, Python, SQL, JavaScript
- **Frameworks:** Spring Boot, Spring Cloud, Hibernate
- **Cloud & AWS:** AWS Lambda, ECS, S3, SQS, API Gateway, DynamoDB, IAM
- **Architecture:** Microservices, RESTful APIs, Event-Driven Architecture (Kafka)
- **DevOps & Tools:** Docker, Kubernetes, CI/CD pipelines, Git, Maven, JUnit

Experience

Senior Backend Developer 2021 – Present
Freelance / Contract Remote

- Designed and deployed highly available Java Spring Boot microservices on AWS (ECS, API Gateway), reducing system latency by 35%.
- Implemented event-driven architectures using AWS SQS and Apache Kafka, enabling seamless data streaming between decoupled services.
- Migrated legacy monolithic applications to AWS Cloud, utilizing DynamoDB and S3 for scalable data storage.
- Collaborated with international, cross-functional teams in English (daily stand-ups, code reviews, and architecture planning).

Software Engineer 2018 – 2021
Tech Solutions Inc. Milan, Italy (Hybrid)

- Developed robust backend APIs in Java/Spring Boot for enterprise financial systems.
- Maintained and optimized CI/CD pipelines using Jenkins and Docker, decreasing deployment times by 20%.
- Enforced clean code practices and test-driven development (TDD), achieving 90% code coverage via JUnit and Mockito.

Education

Master of Science in Computer Science 2018
University of Venice Venice, Italy
