Prabhavit Gupta

Venice, Italy
+39 351 610 7807 • prabhavitg@gmail.com • LinkedIn, GitHub

Forward deployed AI engineer specializing in embedding with teams to turn AI ambition into working enterprise production systems. Experienced in rapid prototyping, bridging the gap between ambiguous business problems and scalable agentic architectures using LLMs, tool use, and RAG. Proven ability to design secure, human-in-the-loop AI pipelines that integrate seamlessly with legacy stacks and enterprise APIs, driving rapid time-to-value for clients.

Core Competencies

- **Agentic AI & LLMs:** Anthropic API, OpenAI, multi-step agent orchestration, Model Context Protocol (MCP), structured output parsing, RAG pipelines, and rapid experimentation.
- **Enterprise Integration & Governance:** Designing human-in-the-loop workflows, schema validation, and secure API integrations across CRMs, payment flows, and legacy architectures.
- **Production Engineering:** End-to-end ownership from rapid prototyping to production deployment, evaluating hallucination rates, latency, cost, and reliability.
- **Backend & Cloud:** Python, TypeScript, React/Next.js, SQL databases (PostgreSQL, MySQL), Docker, AWS, and automated CI/CD deployment pipelines.

Professional Experience

FlowSpace.co **London, UK (Remote)**

Full-Stack & AI Engineer (Freelance) *Mar 2024 - Aug 2026*

- Built and shipped an AI data pipeline orchestrating multi-step LLM agents with tool use and RAG to ingest documents across various formats (PDFs, spreadsheets, web pages) into production.
- Designed strict human-in-the-loop governance workflows with schema validation and escalation paths, enabling safe review and deployment of AI outputs by non-technical stakeholders.
- Embedded directly into customer ecosystems to build integrations against APIs and booking systems, managing rate limits, webhooks, and retry logic across service boundaries.
- Developed RAG-backed support agents that answer complex queries against live platform data, implementing confidence scoring and retrieval quality monitoring for reliability.
- Co-led the migration of a live marketplace off a legacy stack into a robust Next.js and backend architecture, scaling the active user base from 2,000 to over 4,500.

Get2Germany.com **Berlin, Germany**

Developer & Automation Specialist *Jan 2024 - May 2024*

- Delivered rapid automation solutions integrating Google APIs and AI extraction tools to streamline workflows for discovering courses, internships, and jobs.

Clubee.com **Foetz, Luxembourg**

Developer & QA (Freelance) *Sep 2023 - Aug 2024*

- Executed frontend API integrations, automated unit testing, and deployed robust QA processes, bridging technical implementation with end-user requirements.

Tractionboard.co **Utrecht, Netherlands**

Developer Intern *Aug 2023 - Oct 2023*

- Engineered initial AI features by integrating the OpenAI API and Sendgrid, accelerating early prototyping and platform adoption.

Independent Projects

UltraStrategy

AI Automation Developer *2024 - 2025*

- Engineered a custom CV-parsing data extraction engine utilizing LLMs to streamline operations and enhance platform matching capabilities.

Urlink

Project Manager & AI-Assisted Developer *2025*

- Worked directly with the client to translate business requirements into a scalable platform, architecting the application logic using Next.js and Supabase.

Education & Certifications

Ca' Foscari University **Venice, Italy**

BA Philosophy, International Studies & Economics *Oct 2020 - Jun 2024*

Minor in Entrepreneurship.

Tray.AI Build Practitioner & Microsoft Copilot Studio Agent Academy *Sep 2024*
