## Career Summary

- Forward Deployed AI & Automation Engineer with 2+ years of production experience architecting, embedding, and deploying agentic solutions, multi-provider LLM pipelines (Claude, OpenAI, Azure), and resilient enterprise automations.
- Proven track record driving rapid time-to-value: translating ambiguous business objectives into scalable production architectures, establishing rigorous AI guardrails, context engineering, RAG, and automated validation.
- Hands-on production engineering background across cloud-native architectures (REST/Webhooks, Docker, CI/CD, PostgreSQL), Microsoft Copilot Studio, and client-embedded cross-functional stakeholder delivery.

## Technical Skills

- **AI Platforms & Agentic Systems** – Claude (Anthropic), OpenAI APIs, Azure OpenAI, Microsoft Copilot Studio, Model Context Protocol (MCP), Multi-Agent Orchestration (LangChain, LangGraph), RAG, Context Engineering
- **Languages & Backend Engineering** – Python, TypeScript, JavaScript, SQL (PostgreSQL), RESTful APIs, Webhooks, FastAPI, Microservices, Data Ingestion & ETL Pipelines
- **Production Infrastructure & Reliability** – Docker, Git/GitHub, CI/CD Pipelines, Postman, Linux CLI, Structured Logging, Retry & Dead-Letter Handlers, Observability & Debugging
- **Enterprise Hyper-Automation & Integration** – Microsoft Power Automate, Tray.AI, n8n, Supabase, API Schema Design, Identity & Access Integration, Agile / Jira

## Visa & Authorization

- **Work Authorization** – European Long-Term Residence Permit (Italy / EU) – Full legal authorization to work across Spain/EU/remote without visa sponsorship. Partita IVA available.
- **Languages** – English (Fluent / Native-level professional), Italian (Conversational / Working proficiency), Spanish (Elementary), Hindi (Native).

## Professional Experience

**FlowSpace.co** — *Lead Developer (Full time, Freelance)*
*London, UK / Remote* — *Mar 2024 – Ongoing*

- **Product & Deployment Ownership:**
  - Scaled platform from 2,000 to 4,500+ active users through rapid iterative feature deployment and automated operational workflows
  - Spearheaded architecture migration from monolithic low-code to modern decoupled Next.js and backend API microservices
  - Documented end-to-end system architecture, interface contracts, and API schemas across cross-functional enterprise stakeholders
  - Embedded directly with client marketing, operations, and technical teams to translate business bottlenecks into automated tooling
  - Streamlined customer onboarding and support escalation workflows with autonomous AI agents and intelligent routing
- *Tools: Playwright, Jira, Google Sheets, ClickUp, Miro, Google Analytics, Postman*
- **Technical Implementation:**
  - Architected automated ingestion pipelines scraping and processing partner data, expanding platform catalog by 120%
  - Integrated bidirectional REST APIs (Office Rnd, Nexudus) for automated real-time booking confirmation and inventory sync
  - Built automated CRM lead capture, enrichment, and deduplication workflows connecting marketing funnels to sales ops
  - Designed GTM outbound automations, webhook event listeners, and real-time Slack notification alerts for mission-critical events
  - Developed commuter calculation and geo-routing tools via external mapping APIs

  - Implemented error handling, dead-letter retries, and SQL integrity checks for continuous operational uptime
  - *Tools: Python, n8n, Claude Code, TypeScript, REST APIs, Webhooks, Bubble.io, PostgreSQL, Postman, GitHub*

**Urlink** *Project Manager & AI Developer (Freelance)*
*Barcelona, Spain / Remote* *Apr 2025 – Jul 2025*

- Delivered custom client AI workflows and automated web platforms leveraging modern headless architecture and rapid prototyping
- Implemented custom client automations, automated data ingestion pipelines, and real-time analytical dashboards
- *Tools: GitHub, Supabase, Netlify, JavaScript, Bolt.new*

**UltraStrategy.com** *Automation Developer (Collaborator)*
*Paris, France / Remote* *Dec 2024 – May 2025*

- Engineered an automated document parsing and data extraction pipeline using n8n and Eden AI for enterprise document ingestion
- Automated multi-role user onboarding, data transformation, and CRM synchronization workflows
- *Tools: n8n, Eden AI, REST APIs, Webhooks, Bubble.io*

**Qomodo** *AI and Low-Code Developer (Collaborator)*
*Milan, Italy / Remote* *2024 – Jan 2025*

- Developed multi-branch management dashboards and automated operational reporting workflows
- Handled data sync, webhook integration, and state management for client companies
- *Tools: Bubble.io, Webhooks, REST APIs*

**Get2Germany.com** *Lead Developer & Automation Specialist (Part time)*
*Berlin, Germany / Remote* *Jan 2024 – May 2024*

- Integrated Google APIs, analytics tracking, and automated event pipelines for candidate funnel tracking
- Built AI-powered search and automation tools matching candidate profiles against educational and job databases
- Optimized relational databases and eliminated manual data entry through n8n background workflows
- *Tools: n8n, Bubble.io, Google Cloud APIs, Figma, Trello*

**Clubee.com** *Developer & Quality Assurance (Full time, Freelance)*
*Foetz, Luxembourg / Remote* *Sep 2023 – Aug 2024*

- Built core integrations with Clubee backend APIs across sports federation management modules
- Designed automated test flows and regression quality assurance checks for public releases
- *Tools: Bubble.io, GitHub, Postman, REST APIs, Figma*

**Tractionboard.co** *Automation & Low-Code Developer (Internship)*
*Utrecht, Netherlands / Remote* *Aug 2023 – Oct 2023*

- Integrated OpenAI API endpoints for automated content summarization and customer insight generation
- Implemented SendGrid email automation triggers, user onboarding funnels, and Google Analytics 4 tracking
- *Tools: ChatGPT/OpenAI API, SendGrid, Bubble.io, Google Analytics*

## Education
