Prabhavit Gupta

+39-351-610-7807 prabhavitg@gmail.com Linkedin Venice, Italy

Career Summary

- Automation & Robotics Engineer based in Veneto (Venice), holding dual degrees in Mechanical Engineering (B.E.) and Management Engineering (M.Sc., Politecnico di Milano).
- Solid experience managing industrial automation and robotics integration projects from initial concept through system commissioning (messa in esercizio e collaudo).
- Proficient in programming control algorithms and telemetry pipelines in Python and C++, with working knowledge of PLC logic (Siemens, Rockwell) and robotic workcells.
- Proven capability in mechanical design (CAD/AutoCAD/Creo), supplier technical coordination, economic feasibility analysis, and Lean Manufacturing principles.

Technical Skills

- **Robotics & Industrial Automation** – Robotic Workcells, Kinematics, PLC Control Logic (Siemens TIA Portal, Rockwell), HMI/SCADA Interfaces, Fieldbus Networks (Profinet, Modbus)
- **Software Development** – Python, C++, Bash, Linux, SQL, ROS / Robotics Frameworks, Automated Verification Scripts, Git
- **CAD & Mechanical Design** – 3D Modeling (AutoCAD, Creo, SolidWorks), Mechanical Systems Sizing, Pneumatic & Electrical Schematics
- **Project Management & Lean** – Technical Feasibility Studies, CAPEX/OPEX Analysis, Vendor Technical Management, Lean Manufacturing, Factory Acceptance (FAT/SAT)
- **Testing & Commissioning** – Machinery Collaudo, Sensor Calibration, Root Cause Analysis, Technical Operating Procedures

Visa & Language

- **Language** – Italian (Conversational / Intermediate), English (Fluent / Professional), Hindi (Native)
- **Work Authorization** – European Long Term Residence Permit (No Visa Sponsorship required). Driving License (Patente B). Resident in Veneto (immediate availability for Noventa di Piave).

Professional Experience

FlowSpace.co — *Automation & Robotics Systems Lead*
London, UK / Remote — *Mar 2024 – Ongoing*

- **Automation Project Engineering & Delivery:**
  - Directed the technical architecture and delivery of distributed automated process systems, coordinating hardware interfaces and software deployments.
  - Developed high-reliability telemetry pipelines and control routines in Python and C++, evaluating cycle times and anomaly recovery.
  - Drafted comprehensive technical specifications, user requirements, and acceptance testing checklists for external technology vendors.
- **Continuous Improvement & Process Efficiency:**
  - Partnered with operations teams to streamline automated workflows, applying Lean concepts to eliminate throughput bottlenecks.
  - Ensured 99.9% operational availability across active automated processes via proactive diagnostic monitoring and preventive maintenance protocols.
- *Tools: Python, C++, Linux, Docker, Industrial Networks, Git, Lean Tools*

Urlink — *Systems Automation Engineer*
Milan, Italy — *Jul 2023 – Feb 2024*

- Conducted on-site testing and commissioning (collaudo) of automated industrial machinery and robotic handling systems at manufacturing customer plants.

- Verified PLC I/O configurations, safety interlocks, and sensor integrations adhering strictly to electrical schematics and CAD drawings.
- Collaborated with suppliers and plant technicians to resolve mechanical and control logic discrepancies during equipment installation.

UltraStrategy *Automation Developer*
Remote, Germany *Sep 2022 – Jun 2023*

- Built automated data logging tools in Python monitoring industrial equipment operational parameters, cycle efficiency, and downtime trends.
- Synthesized multi-stream machine sensor logs into structured performance analytics for quality and plant management.

Education

Politecnico di Milano *M.Sc. in Management Engineering (Digital Business & ICT)*
Milan, Italy *2020 – 2023*

Thapar Institute of Engineering and Technology
B.E. in Mechanical Engineering
Punjab, India *2014 – 2018*
