Prabhavit Gupta

Maintenance & Service Technician Candidate (Engineering Background)

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | Venice, Italy (Open to Relocation to Lehigh Valley, PA)

Summary

Systems and software engineer with a strong diagnostic mindset and troubleshooting ability, transitioning into hands-on field engineering and maintenance. Highly comfortable analyzing complex systems, interpreting logic and technical diagrams, and resolving critical system failures under pressure. Brings a track record of rigorous independent remote work, robust safety and QA compliance, and a strong learning aptitude for industrial instrumentation, 4-20 mA signals, and electromechanical systems. Open to 24/7 call-outs, extensive travel, and eager to bring a precision-driven engineering approach to Air Products' cryogenic and gas supply systems.

Skills

- **Diagnostics & Troubleshooting:** Complex system analysis, root-cause diagnostics, logical fault isolation, multi-meter and instrumentation logic bridging, signal flow tracing.
- **Field & Independent Operations:** Proven history of independent, remote project delivery, meticulous documentation, strict adherence to operational protocols and quality assurance (QA).
- **Technical Adaptability:** Fast acquisition of new technical domains; strong foundational understanding of fluid/data pipelines and control logic applicable to electromechanical and HVAC-adjacent systems.
- **Soft Skills:** Effective communication with technical engineers, project managers, and external clients; calm execution under time-critical operational pressures.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & Systems Engineer (Full-time, Freelance) *London, UK (remote)*

- Conducted root-cause diagnostics and resolved complex integration failures across diverse hardware/software platforms.
- Operated independently in a remote capacity, maintaining 24/7 availability for critical system outages and deploying hotfixes to ensure continuous operational uptime.
- Managed end-to-end testing and QA, enforcing rigorous compliance and safety checks before production deployments.

Clubee.com **Sep 2023 – Aug 2024**
Developer & QA Specialist (Full-time, Freelance) *Foetz, Luxembourg*

- Executed comprehensive system tests and QA protocols, verifying the integrity of complex data flows and backend processes.
- Collaborated with multidisciplinary teams to trace system faults, interpret logic diagrams, and implement reliable repairs.

Tractionboard.co **Aug 2023 – Oct 2023**
Systems Developer (Internship) *Utrecht, Netherlands*

- Built and troubleshooted complex API integrations and logic loops, adapting quickly to new technical architectures.

Technical Adaptability & Projects

- **Systems Integration:** Engineered complex, automated diagnostic workflows that require the same logical rigor and precision as tracing instrumentation circuits (4-20 mA) and PLC control loops.
- **Continuous Learning:** Proven ability to self-start and master new technical environments rapidly, highly motivated to cross-train in brazing, mechanical repair, and cryogenic systems maintenance.

Education

Ca' Foscari University of Venice Oct 2020 – Jun 2024
BA Philosophy, International Studies & Economics (Minor: Entrepreneurship)
Developed strong analytical reasoning, communication, and structured problem-solving skills.
