Prabhavit Gupta

+39-351-610-7807 prabhavitg@gmail.com Linkedin Venice, Italy

Career Summary

- AI Technical Lead & Solutions Architect with deep expertise in AI-assisted software engineering, Generative AI integration, and production agentic architectures.
- Proven leader in establishing AI engineering standards, mentoring developers on LLM tooling (Cursor, Claude, Copilot), and delivering scalable RAG/agent solutions.
- Expert in orchestrating LLM APIs, vector stores, Model Context Protocol (MCP), and microservices with rigorous governance, security, and automated evaluation frameworks.

Technical Skills

- **Generative AI & Agents** – LLMs, AI Agents, MCP (Model Context Protocol), LangChain, LlamaIndex, RAG Pipelines, Vector DBs (pgvector, Pinecone)
- **AI-Assisted Engineering** – Claude Code, Cursor, GitHub Copilot, Prompt Optimization, Context Engineering, Automated Code Generation
- **Software Architecture** – Python, TypeScript, REST APIs, Microservices, Event-Driven Architecture, Docker, CI/CD, Automated Testing
- **Cloud & Governance** – AWS, Azure AI, GCP, AI Governance, Data Privacy, Access Controls, Observability & Telemetry

Visa & Language

- **Language** – English (Professional / Fluent), Italian (Conversational / Intermediate), Hindi (Native)
- **Work Authorization** – European Long Term Residence Permit - No Sponsorship required.

Professional Experience

FlowSpace.co — *Technical Lead & AI Architect (Full time, Freelance)*
London, UK — *Mar 2024 – Ongoing*

- **AI Technical Direction & Architecture:**
  - Spearheaded technical direction for enterprise platform adoption of AI-assisted engineering, standardizing Cursor and Claude workflows across team.
  - Architected autonomous customer service and scheduling AI agents integrated with external booking APIs (Office Rnd, Nexudus) via MCP and webhooks.
  - Built production RAG infrastructure utilizing embedding pipelines, semantic search, and prompt caching to reduce token overhead by 45%.
  - Enforced strict AI governance protocols including input sanitization, automated regression testing, and hallucination guardrails.
- **Engineering Leadership & Scale:**
  - Guided and mentored distributed engineering teams on modern cloud architectures, API contract design, and test-driven development.
  - Scaled platform from 2,000 to 4,500+ active users with 99.9% uptime across production AI microservices.
- *Tools: Python, TypeScript, MCP, Next.js, FastAPI, pgvector, Docker, GitHub Actions, AWS*

Urlink — *Senior AI Solutions Engineer*
Milan, Italy — *Jul 2023 – Feb 2024*

- Led architecture of automated document analysis and intelligent entity extraction microservices for enterprise clients.
- Implemented semantic search engines using embeddings and vector indexing, improving query retrieval accuracy by 30%.
- Designed robust CI/CD deployment pipelines incorporating automated linting, test suites, and model evaluation benchmarks.

UltraStrategy *Automation & AI Developer*
Remote, Germany *Sep 2022 – Jun 2023*

- Developed modular integration middleware connecting enterprise analytics tools via RESTful endpoints and secure token exchange.
- Automated ETL data pipelines across cloud endpoints, validating payload integrity and enforcing schema validation.

Education

Politecnico di Milano *M.Sc. in Management Engineering (Digital Business & ICT)*
Milan, Italy *2020 – 2023*

Thapar Institute of Engineering and Technology
B.E. in Mechanical Engineering
Punjab, India *2014 – 2018*
